

“Andrew Hall: Cosmic Resonance”

Proponents of the EU Model of Cosmology run into an infinite wall of resistance: false preconceptions by consensus science. The EU does not see the cosmos the same way materialists do. Fundamentally, the cosmos is energy. Energy is kinetic motion, or potential motion of matter over a distance. But matter itself is potential energy—so, it’s just all one thing—energy. An Electric Universe is one of energy transformed from kinetic to potential by standing waves of constructive interference. Author and engineer Andrew Hall explains how the shape of matter conforms to the shape of energy flow—and the shape of matter forms circuitry that anchors the shape of energy. It’s a feedback loop.

COSOLARGY INTERNATIONAL
THE SACRED TEACHINGS OF LIGHT

HEAD OVERSEER'S WEEKLY MESSAGE

Wednesday, February 22, 2023
The Twenty-fourth Saying (Part 8)

"The Man having concluded his statement, a second Companion of The Way said, 'I was wondering if the vibrational frequency of the earth could be magnified at that time when the Seven Teachers from the world religions embrace this Teaching?'

"The Man replied to this question by saying, 'The more teachers and the more following, the more impact we are going to have on the world. The coming forth of the Seven Teachers

of the Ecumenical Order of the Churches and Religions of the world, of course, is destined. However, there is a matter of suppression that is facing us. Our problem is that the Powers of Darkness will marshal the nations of the world and the State religions against us. Those are the religions to be feared, the religions of the State, in which the State is considered to be the image of goodness and the leader of that nation the great prophet.

“Peoples are inclined to serve these prophets and State religions. The State is becoming a living god – it feeds the people, cares for them, provides their material and social needs. The god is bountiful as long as homage is paid to it. As a consequence, the State has become the epitome of the Powers of Darkness because it has a tendency to suppress religion and all spiritual expression.

“What appears Good is not Good at all, because fear is used to suppress the people. Large standing armies are maintained; police control is emphasized. All must obey: people and weaker nations. All are threatened with destruction if the will of the State is not strictly followed. With the suppression of spiritual forces, the psychic powers take over and the State and its people are threatened by powers beyond human control. I am not speaking of any one country, but rather of a state of mind that seems to be taking over the world at large.

“Therefore, it is the unification in Ecumenical Order of adherents of the Image and the Word in this Church that will create the vibrational frequency necessary, which will come from the sun, not from the earth. Nothing that we can do on this earth is going to restore it to goodness. The restoration must come from the physical sun and the spiritual Sun. The Sun is the only means available to us. Teachers cannot of themselves alter the world. They can only create an Order. Together, Teachers and the Order can influence the sun of the solar system and pray for the Power of God from the Sun of Righteousness to restructure the world.

“‘This Church, and humanity as a whole, is faced with a tremendous struggle. But we, as Teachers and as members of the Order, do have a priceless treasure – a spirit reborn, a Soul which we can use for the duration of our lifetimes here. It is our task to build a solid foundation for the Church on an ecumenical level and to reflect to the spiritual Sun and the physical sun during the remainder of our lifetimes. When we leave the earth, we will carry on the work in spirit. But our task is to create the Order here so it will endure.’”

Again, if I may be of any personal service to you, please do not hesitate to contact me.

Very truly yours in Light+,

Gene

COSOLARGY INTERNATIONAL
THE SACRED TEACHINGS OF LIGHT

COSOLARGY NEWSLETTER FEBRUARY 2023

Hello Rebecca ,

Welcome to our monthly bulletin with information of interest to friends of Cosolargy International. In this issue, we bring you up to date with current and future events and provide a little background on our founder, the late Gene Savoy Sr, and his explorations into solar cultures, along with some uplifting words of inspiration.

This is the first issue for 2023, a number that equals seven (2+0+2+3) in numerology. Seven is a number of good luck and growth.

If you are curious about the solar techniques and activities of our Community, contact us by using the Contact Form on the [Cosolargy International website](https://cosolargy.org). It will be forwarded to the appropriate representative for your area.

In these trying times, if you would like to have a prayer said for you or others, click the Prayer Request button at the end of this newsletter.

The Origins of Cosolargy

Quotes from Gene Savoy, Sr.

"In the mornings, when the village sparkled under the sun's rays reflected on the snow, Indians dressed in red and brown ponchos came to the entrance of the house and, as silent as stones, sat outside the gate observing The Child+ in the Garden. And The Child+ looked at them with kindness, for they were his brothers and sisters. He would approach and, laying a tender hand on their shoulders, speak to them in a voice that sounded like a morning bird saluting the sun. No one knew what was said, save the speaker and the listener. Once an old lady came begging for food, and The Man [Gene Savoy Sr.] heard The Child [Jamil] call her 'ackhii,' which is the Quechua word for 'light'.

"and when the children of the village came to peer through the gate, The Child gave his clothes and some of his toys to them; for they were poor, and it gladdened him to see them scamper away with laughter in their hearts."

"And the villagers spoke of the marvelous Child who had come to live in their midst. The elders looked away at the distant heights saying: 'This Child is like the summer that melts the snow and warms our hearts. Surely God has sent us a comfortor. And they called The Child 'El Nino.' And the tale was spread here and there throughout the Andes."

Human Love and Divine Love

"Human love is changeable, Divine Love, however, is the most steadfast; there are no changes in it."

"If you let Divine Love in your spirit, you will acquire

power; the power is the Light that moves.

"If love acts in your soul, it will give you warmth. Warmth is the nicest, it is necessary because, with warmth, everything glows and ripens. Without warmth, humans cannot grow and ripen.

"There is nothing nicer in Man's life than this, to be a pure child of God, with pure thought, pure wishes, and pure actions. Not to be just for a day, but from the day you were born until the day you leave Earth, be an excellent Child."¹

"know that if you do not love, you cannot enter the Kingdom of God. No one's foot can ever step in there if they do not love.

"If you live with love in the world, you will have one result. If you live without love, you will have another. If you live with hope, you will have one result; if you live without hope, you will have another.

Humans, for their own good, must Love God." ~[Biensa Douno](#)

Human Love

When Douno speaks of human love, he is talking about ordinary human love, or love of material things, including material beings. Such love is changeable, as most of us know. As we age and change, the things we love change. Even the people we love sometimes change, even though we believed at one time that that would never happen.

Divine Love

Humans can also have Divine Love, but this is love of a higher nature. It is love of God, love of the spirit and soul, love of our higher self, love of Heaven as it really is and not as we wish it to be. Many people will say they have such love, but few of them actually do. You can't love something when you actually don't know what it is, you only have a vague concept of it as described by others. If you love God as a little old

man sitting in the clouds and judging everyone, you do not have Divine Love, because that human-created concept of God is far from reality. If you think Heaven is much like earth, where you will once again be with old friends, relatives, and pets, you have a false concept of Heaven, and you don't have Divine Love. To have Divine Love, you must awaken your spiritual faculties and develop them until you are aware of what Heaven and God really are. Then you will Love God, Heaven, and all that God created including human Souls. When that happens, you will have Divine Love.

Love Gives Warmth

Love may not literally warm you, but it will make you feel warmer, in a sense. Any form of real love fills us with joy and warmth. That is not the same as lust, which is often confused with love. The warmth of the sun does make everything grow and flourish. The Light of the Spiritual Sun helps us grow and flourish in a spiritual sense. The warmth of that light awakens and develops our spiritual faculties as nothing else can.

Kingdom of God

Douno is correct in saying that without Love, specifically Divine Love, we cannot enter the Kingdom of God. Heaven is a place of Love, Pure Love, Divine Love, and no being, no spirit, is allowed there that does not have that Divine Love. To allow someone in there who doesn't have Divine Love would be polluting the purity of Heaven, so it doesn't happen. Those who think that everybody goes to heaven simply because they have physically died are wrong. If that were true, such beings as Hitler and Genghis Khan would have gone to Heaven after death. Obviously, that could not happen if Heaven is to maintain its purity. Such beings might get there eventually, but certainly not until they have gone through centuries of purification.

**“Two Black Holes Met by
Chance, And it Created
Something Never Seen Before”**

The ripples in space-time generated by colliding black holes have taught us a lot about these enigmatic objects.

These gravitational waves encode information about black holes: their masses, the shape of their inward spiral towards each other, their spins, and their orientations.

From this, scientists ascertained that most of the collisions we've seen have been between black holes in binary systems. The two black holes started as a binary of massive stars that turned into black holes together, then spiraled in and merged. Of the 90 or so mergers detected so far, however, one stands out as very peculiar. Detected in May 2019, GW19052 emitted space-time ripples like no other.

“Earth’s inner core may have stopped turning and could go into reverse, study suggests: CNN”

The rotation of [Earth](#)'s inner core may have paused and it could even go into reverse, new research suggests.

The Earth is formed of the crust, the mantle and the inner and outer cores. The solid inner core is situated about 3,200 miles below the Earth's crust and is separated from the semi-solid mantle by the liquid outer core, which allows the inner core to rotate at a different speed from the rotation of the Earth itself.

With a radius of almost 2,200 miles, Earth's core [is about the size of Mars](#). It consists mostly of iron and nickel, and contains about about one-third of Earth's mass.

[Read the full article here.](#)

Not everyone agrees with what this article says. Here are some

comments and links from Cosolargy member, Dr. Stephan Fuelling (physicist).

Very interesting! I also read that the Earth's spin slowed down but very, very little. It could be that these two events are coupled together. If that happened 70 years ago, we didn't have the technology back then to notice it.

I hope the following will never happen with Earth:

https://m.youtube.com/watch?v=1VPfZ_XzisU

I think that the mass distribution of the Earth is not uniform enough for this to happen. But here is someone who modeled it with an Earth model with exaggerated difference in the mass distribution. And it flips maybe every 100 days. So obviously this doesn't happen. I am not sure if our Moon stabilizes the Earth so that this doesn't happen.

<https://m.youtube.com/watch?v=J-l-SbCFhL0>

Here is an answer that I found on Quora:

" No, the conditions for this effect simply don't apply. Rotations around the first and third principal axis are stable. Now, I am not sure whether Earth's axis of rotation will count as the "first" or "third" principal axis; I'll leave it for you to investigate the details. But the point is, rotation around one of them results in the largest moment of inertia, and rotation around the other one results in the smallest moment of inertia – and both of these are stable.

Since Earth is squashed at the poles, its actual rotation is such that the moment of inertia is largest."

And on Research Gate I found this (see attached). There are some ancient references to the sun rising in the west!

The Twenty-fourth Saying (Part 7)

Please pay special attention to this portion of the Saying, as I find it very profound and answers many questions.

"Then the second Mariner to speak said, 'I understand the need for educating the members of the many religions of the world and the clergy and laity of the Christian religion. However, the only way we can instruct or educate people is if they desire to be instructed or educated. How do we do this? It seems to me that the very people we will have to educate or instruct will be critical or will label us heretical. What can be done to make them want to come to us?'

“The Man answered saying, ‘While we are being trained to become Disciples of God and to become Teachers of the Image and the Word in the Church fulfilled in an ecumenical manner for the unification of all churches and all religions into one, we must acknowledge our human limitations.

“‘We have developed our spiritual Vision to look upon the Sun of Spirit. We have also strengthened our faculty of vision to look upon the sun of the world – the sun of the solar system by which all physical life is sustained – the same that lights and heats the earth. But the True Light that lights the world is God’s Sun of Righteousness – the Sun of Creation. And because we are laboring within the Righteous Church and exemplifying the Righteous Life, we have an effect on the physical sun.

“‘While we are involved in the great struggle between the Powers of Light and the Powers of Darkness, which is a cosmic and dimensional event, we must constantly keep in mind that the Righteous Way that we live has an influence upon the material sun. Indeed, it has been said that we are to use the sun as a Sword of Light and Justice to do battle with unrighteousness wherever it is found on Earth. We thus make the sun more brilliant, and we invoke God to make the Sun shine seven times brighter than before to burn up the wicked. We do not understand the nature of this brilliance, but we do know that Evil will be blotted out and that the Good will be able to live on Earth as a result.

“‘With the strengthening of the sun’s rays, whether by heat or by some kind of illuminated intelligence – after all, this has been prophesied and must take place since it was a godly thought recorded by Holy Ones – the world will cry out for guidance, leadership and instruction because without these it will not be able to survive. If we take air away from a person or plunge that person under water for a long period of time, that person will become desperate. Likewise, without Light people are going to become desperate.

“The problem is that the nations of the world that claim God’s creatures for their own may try to destroy this Church as they did the Church of the First Dispensation. It remains with the Teachers of this School to perpetuate the Teachings and ensure its survival. We are more than just Teachers living The Way. We are spiritual warriors who are fighting with Light against Darkness. This Light comes from our souls, from our minds, and from our spirits. This Light has to be handled wisely. Since it is our destiny to assist God in bringing about the salvation of the world, we can assume that the cosmic battle will bring adherents to our Teaching.’”

Again, if I may be of any personal service to you, please do not hesitate to contact me.

Very truly yours in Light+,

Gene
