

“Looking Into Nature Rather Than Spirit”

“If you suffer yourself to be always looking into Nature and the things of Time, and to be leading the will, and to be seeking somewhat for thyself in the desire, it will be impossible for thee ever to arrive at the Unity, that you wish for. Remember this and always be on your watch. Give not your mind leave to enter into, nor to fill itself with, that which without you; neither look backwards upon yourself; but quit yourself and look forward upon Christ. Let not your left eye deceive you, by making continually one representation after another, and stirring up thereby an earnest longing in your self-propriety; but let your right eye command back the left; and attract it to you, so that it may not gad abroad into the wonders and delights of Nature. Yea, it is better to pluck it quite out, and to cast it from thee, then to suffer it to proceed forth without restraint into Nature, and to follow its own lusts. However, for this there is no necessity

since both eyes may become very useful, if ordered aright; and both the divine and natural Light may in the Soul subsist together, and be of mutual service to each other.” ~[Jacob Boehme](#)

Always Looking Into Nature

Let's get one thing straight right away. There is nothing wrong with Nature. Nor is there anything wrong with enjoying what nature has to offer. What Boehme is talking about, we would today call Materialism. He is warning us to not get caught up in the traps and endeavors of materialism. To use the more proper spiritual terminology in use today, he is telling us to not get attached to the material world and the things in it.

A Special Blessing for Madyson Nicole Kennedy

Madyson Kennedy with Bishop Gene Savoy Jr.

On Saturday, May 22, 2021, during the Communion of Fellowship Service held in the Chapel of The Holy Child, Madyson Nicole Kennedy was presented to the congregation and received a special blessing from both the Church congregation and Bishop Gene Savoy Jr.

Madyson, the niece of Community member Claudia Grady, received the rite of Baptism in the Chapel years before. The special blessing received by Madyson this year on the day of her fourth birthday commemorates a tradition long followed in Mexico.

Madyson Kennedy and family with Bishop Gene Savoy Jr.

“Faith in God and Man”

“The success of a person depends on their faith: their faith in God, their neighbor and themselves. Be glad when you meet a smart person, it is a blessing for you. ...

“There are countless abilities in Man’s soul, because it is the expression of God Himself. The soul is made of the image and likeness of God. One cannot understand these things until he tries them. You say: ‘I believe in God.’ Firstly, think about God, then you will feel God. You have to become a servant of God; you have to do something for Him. If you have

a Lord for whom you have not thought the best, if you have not put Him in yourself to think the best, to have the best feelings, to do good things for Him, to do favors for others, you cannot know God.

“The name we have for God is not the true one, because if we know His true name, it will get stained. The one who pronounces the name of God must possess pure heart and deeds. When you pronounce the name of God, pronounce it with that Love, faith, and hope as if God is something great.

“In love, there are no difficulties. In love, there is no suffering. In love, there are no misunderstandings. ... I say: love is a nice world where I can rest; in love is paradise. ... Allow love to start acting in you where it has not acted so far.” ~[Biensa Douno](#)

Having Faith

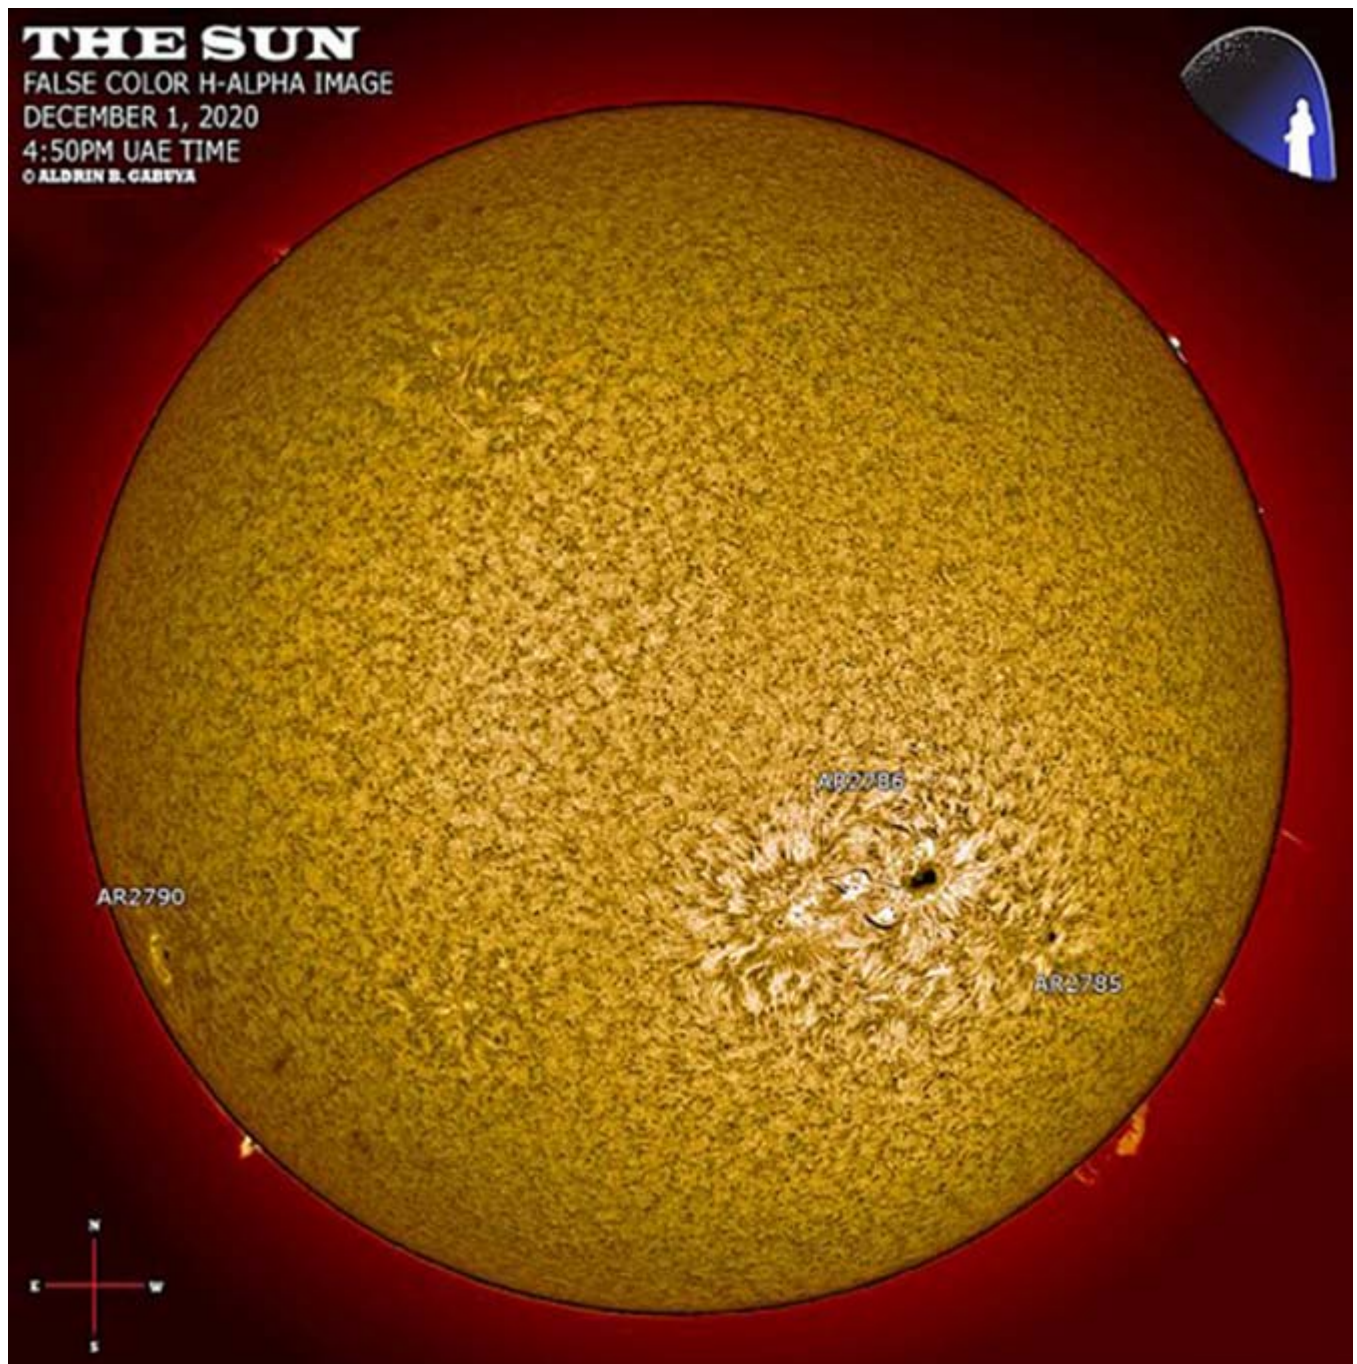

Faith is belief in God, people, or ideals. We all need to have faith in something. We should start with having faith in ourselves and in God. Once we have that, we should develop faith in others and faith in ideas and beliefs. Hopefully, we are discerning enough to have faith in ideas and beliefs that are true, not unproven fantasies. If we can't develop faith in others, we can't trust others. If we can't trust others, we can't learn from them.

Some will argue that faith in God is faith in the unproven and unprovable, but that isn't true. The existence of a Supreme Being or Force is logical and provable, although the methods of proof may not meet the criteria of physical science. God, being spirit, cannot be proven by the rules of matter, or He would be matter. But there are sciences of spirit that allow the existence of God to be proven, or at least shown to be probable.

“Sunspot AR2790”

December 2, 2020

Solar phenomena come from electricity flowing through space.

The conventional view of the Sun is illustrated by a popular science website: "Our Sun is made up of elements left over from the Big Bang, elements formed from dying stars, and elements created in supernovae."

The basic premise of the Electric Star theory is that stars

are immersed in plasma, and are connected by electric circuits that run throughout the galaxy. Since the Sun is also electrically interconnected with the galaxy and its planets, it should be thought of as a charged object that has reached equilibrium with the forces of its environment. That balance is not completely stable, however.

Invitation to a Virtual Conference June 2021

May 18, 2021

Dear Consociates,

We are pleased to invite you to take part in a special event we will be hosting this year for all Consociates of The Community throughout the world.

Next year – 2022 – we will hold a full, in-person Convocation during the time of Pentecost, which we celebrate each year on June 6th. This year – 2021 – we have created a virtual program that will begin on Sunday, June 6th, to commemorate the spiritual heritage of Pentecost.

In the early Church that originated out of the Essene communities, Pentecost was a time of regeneration and revitalization for the Community that signified the annual renewal of the Covenant. In a similar state of gratitude, peace and love, we will be able to participate together in the Divine Service on June 6, 2021, at one with God and the cosmos. The Book of God's Revelation records the importance of this date in the Sacred Calendar of the Second Advent Church: In 1982 Revelations were received atop the Temple Mount on Divine Law and on the building of the Shrine of God's Waters.

It is always important to reconnect with the Center, with others from around the world, and with our Prophecies and Teachings. And so we welcome this event as an important moment to connect, reconnect, and fuse together all members of Cosolargy International. In this era of an emerging new dimension of Consciousness, there is a power in the Liturgics and the Liturgy we perform in Community, aligned with the spiritual Forces of Light, to serve as an antidote to the influence of Dark Powers.

You can take part in this year's conference by:

- * **visiting the Cosolargy Forum page** on Facebook on June 6th to watch the "State of The Community" presentation live or by visiting the page at your convenience later to watch the recorded version and to see further announcements on the conference.

- * **attending the Zoom conference** hosted in North America on June 12th at 2:00 PM Pacific Daylight Time.

- * **sending in questions for discussion** that you may have on the "State of The Community" presentation or on concepts of

Cosolargy which you would like to hear more about.

Below please find the schedule for our virtual conference:

June 6

Sunrise Divine Service
Breakfast at the Sanctuary
“State of The Community” address by Bishop Gene at the
Monastery Gardens

June 12

Zoom meeting at 2:00 PM PDT

Prerecorded videos from our Center in Northern Nevada:

Sanctuary tour
Cathedral Church of the Americas
Sanctuary guest suite
Gene Savoy, Sr. Heritage Museum
Steamboat Hot Springs Healing Center

Live Q&A on “State of The Community” address

Live Q&A on Cosolargy concepts

Prerecorded “Hello from Japan” with Bishop Yukinori and video
footage of a sunrise service, the Center in Japan, and members
of the Japanese Community

Prerecorded video of property in Mexico & live greeting from
Humberto Garcia

Live greetings from international Consociates participating in
the Zoom meeting

If you are not already registered on the Cosolargy Forum, go to the Facebook page and request to join the group before June 6th. You will receive notification from the forum administrator, Harold Boulette, when you are registered.

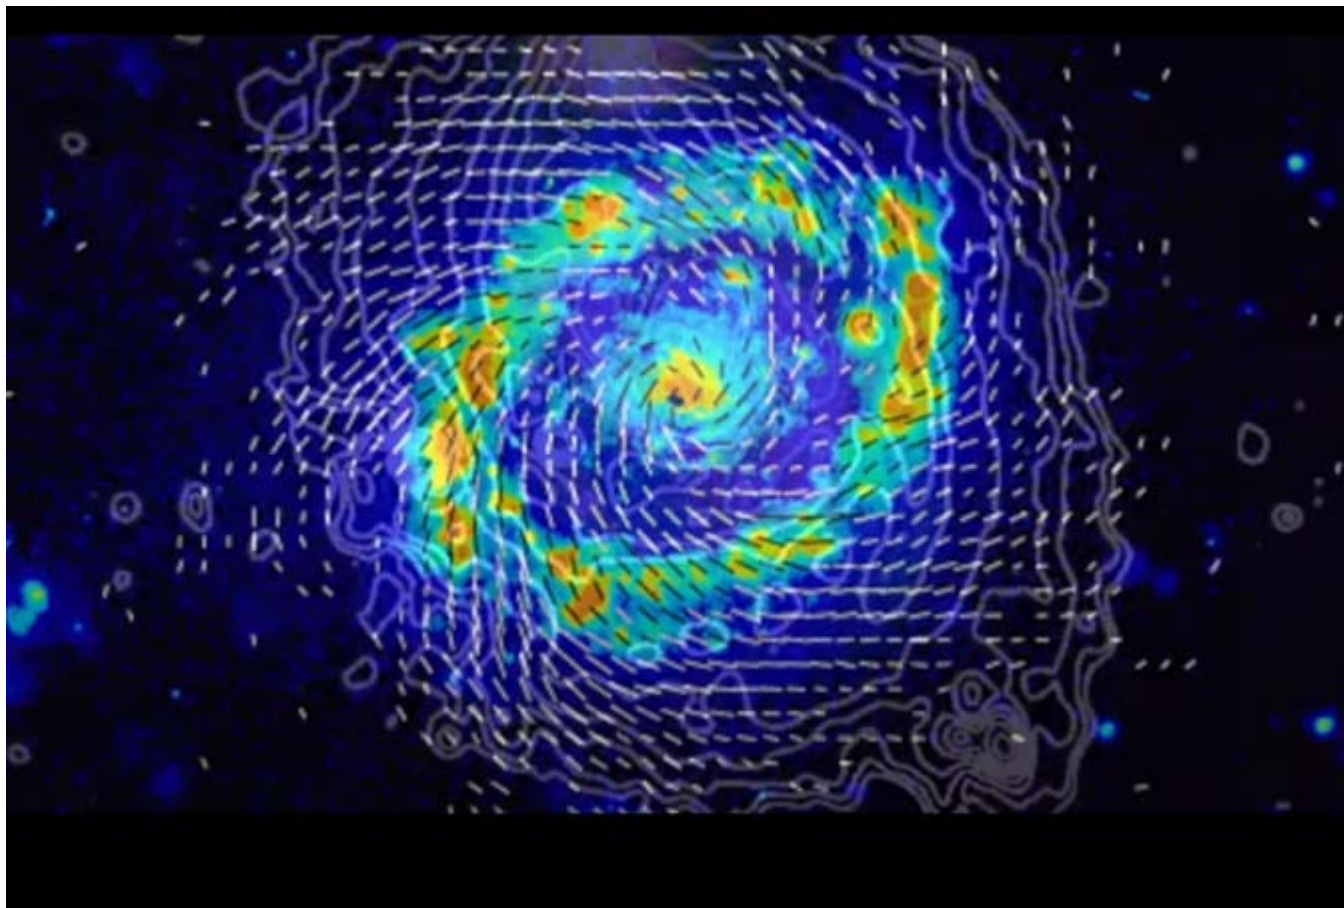

To take part in the live Zoom conference on June 12th, click on the link to the meeting which you will receive by email shortly before the conference is scheduled to begin.

Your active participation has a profound meaning beyond words. Your presence will enhance the forces that have activated and motivated our Community for many decades. We look forward to seeing you!

Yours, most sincerely,

Reverend Francine Petrovich
Conference Coordinator

**“No Magnetic Universe w/o
Electric Currents”**

It may be the greatest surprise for mainstream cosmologists since the dawn of the Space Age: the detection of powerful magnetic fields at all scales throughout the Universe. In recent years, with the ever finer detection of cosmic magnetism, astrophysicists have increasingly sought an answer to the problem – an answer which might somehow be compatible with acceptable, Big Bang cosmology.

It's important to note, as we've done in numerous past episodes, that mainstream cosmologists did not predict the so-called magnetic universe. In fact, a telling glimpse into the prevailing thoughts on cosmic magnetism can be found in the 1999 NASA web item entitled, 'Do magnetic fields exist throughout space?' It states, "On the cosmological scale, there is no data to suggest that magnetic fields are present. They certainly are not important in the dynamics of the universe for any reasonable range of field strengths

consistent with present observational constraints.”

However, today, not only do mainstream cosmologists view cosmic magnetism as important, some astrophysicists are counting on mysterious magnetism to resolve ad hoc some of the biggest evidentiary problems for the Big Bang hypothesis. In this episode, we’ve asked retired professor of Electrical Engineering Dr. Donald E. Scott to offer his thoughts on the real source of cosmic magnetism in our Electric Universe.

“Look Back, Look Forward and Awaken”

To look back upon things of former ages, as upon the manifold changes and conversions of several monarchies and commonwealths. We may also foresee things future, for they shall all be of the same kind; neither is it possible that they should leave the tune, or break the concert that is now begun, as it were, by those things that are now done and are now brought to pass in the world. It comes all to one therefore, whether a man be a spectator of the things of this life but forty years, or whether he see them ten thousand years together: for what shall he see more? 'And as for those parts that came from the earth, they shall return unto the earth again; and those that came from heaven, they also shall return unto those heavenly places.' Whether it be a mere a mere dissolution and unbinding of the manifold intricacies and entanglements of the confused atoms; or some such dispersion of the simple and incorruptible elements. With meats and drinks and divers charms, they seek to divert the channel, that they might not die. Yet must we needs endure that blast of wind that cometh from above, though we toil and labor never so much." ~[Marcus Aurelius](#)

Look Back

There is nothing wrong with remembering the past. Those who say we must completely forget the past and just deal with the present are being ridiculous. I learned to speak English in the past. If I forgot the past, I wouldn't understand that language anymore. I learned to write in the past. If I forgot the past, I wouldn't be able to write. I couldn't read, walk, drive a car, etc. if I completely forgot the past. So we do need to look back, we do need to remember what we learned in the past, but without letting it limit what we can do now. But Aurelius isn't just talking about our personal past, but historical past, looking back hundreds of years.

Foresee Things Future

What Aurelius is saying is that if we look at the past, we can predict the future because things don't change much. What happened last century is pretty much what will happen in the next century. The details will vary, the technology will change, but human nature remains the same. So if Aurelius looked five centuries into the future and saw a world full of disease, death, war, famine, etc. his predictions would have been correct. Those things happened then as they do now. However, to suggest that it will always be so is, in my opinion, a defeatist attitude that we should not subscribe to.

Albert Einstein is credited with saying that we can't solve a problem with the same thinking that created it. Since the basic nature of humanity doesn't change, neither does our thinking. At least that is the theory. But in fact, it is possible for humanity to change on a very basic level, and I believe that is starting to happen, if only to a few of us.
