

“Open star clusters are loose groups of stars”

Open star clusters

Open star clusters are young, *loosely bound* gatherings of stars. The stars in these clusters were born together. They're still sometimes moving within the [nebula](#), or cosmic cloud, of their creation. They're occasionally called [galactic clusters](#).

Scientists have discovered more than 1,100 open clusters around us in space. They may contain a handful of stars or thousands of stars. Most likely won't survive more than several orbits around our galaxy's center before being disrupted and dispersed. You can see many open star clusters with the eye alone! Or you can aim binoculars or telescopes their way ...

“Supermassive black hole a feature of most galaxies”

The Event Horizon Telescope – the same group that, in 2019, obtained the first-ever image of a supermassive black hole, in the galaxy M87 – says it will make a groundbreaking announcement on Thursday, May 12, 2022. The press conference will be held at ESO’s headquarters in Garching, Germany, beginning at 15 CEST (13 UTC, or 8 a.m. CDT). The press conference is focused on Sagittarius A, the supermassive black hole at the center of our own Milky Way galaxy. Could it be the first-ever image of our galaxy’s supermassive black*

hole?

**“First 3D view of globular
cluster formation and
evolution”**

Globular clusters are giant balls of millions of stars held together by gravity and orbiting in the halo of our Milky Way galaxy. On November 5, 2024, scientists from the National Institute for Astrophysics (INAF), the University of Bologna and Indiana University said they've conducted the first 3D analysis of how stars move within 16 globular clusters. Their study adds to the understanding of the formation and evolution of these massive stellar groups.

Cosolargy Newsletter November 2024

COSOLARGY INTERNATIONAL
THE SACRED TEACHINGS OF LIGHT

COSOLARGY NEWSLETTER NOVEMBER 2024

Hello Gene,

Welcome to our monthly bulletin with information of interest to friends of Cosology International. In this issue, we bring you up to date with current and future events and provide a little background on our founder, the late Gene Savoy Sr, and his explorations into solar cultures, along with some uplifting words of inspiration.

If you are curious about the solar techniques and activities of our Community, contact us by using the Contact Form on the [Cosology International website](#). It will be forwarded to the appropriate representative for your area.

In these trying times, if you would like to have a prayer said for you or others, click the Prayer Request button at the end of this newsletter.

The Origins of Cosology

Quotes from Gene Savoy, Sr.

"And the kind Child of Light+ kissed his earthly guardian on the cheek, thanking him for attending him during his brief sojourn on earth. And he took both his hands into his own, as had the Angel of Light+ years before, and said in the Light+ of his eyes: "I anoint and ordain you to the New Apostolic Ministry in the name of God the Father,+ and the Universal Christ+ and in the name of all the Holy Ones of old who are alive and with me now. And you shall ordain others into the Order teaching man's pre-eminence and responsibility to the fellowship. And if any man or woman ordained in any Church taking the name of God the Father,+ or Christ,+ oppose this Teaching, let them know they who call themselves Christians are denying themselves. And the prayers and supplications generated by their intellectual faculties, though they live moral lives, shall be empty words in space; for God+ hears only those words spoken by the spirit of man."

**Knowledge of Self Leads to
Knowledge of God**

“Should you who possess everything not know yourself? If you do not know yourself, you will not enjoy what you own. But know yourself and what you have enjoy.

“The perfect human can neither be restrained nor seen. If they see him, they can stop him, so there is no way to grace but to put on the perfect light and become perfect. All who put on that garment will enter the kingdom. This is the perfect light. We must become perfect before leaving this world. Who is rich and has not thrown it off will not share in the kingdom but will go as imperfect into the middle. Only Jesus knows where that will end.

“Now we have the manifest things of creation. We say, ‘The strong are they who are held in high regard, and the obscure are the weak who are despised.’ Contrast the manifest things of truth: they are weak and despised, whereas the hidden things are strong and held in high regard. The mysteries of truth are revealed, though, in type and image. The bridal chamber remains hidden. It is the holy in the holy. The veil at first concealed how god controls creation, but when the veil is torn and things inside are revealed, this house will be left desolate, or rather it will be destroyed. But the

whole inferior godhead will not flee from these places into the holies of the holies, for it cannot mix with the pure light and the perfect fullness. Rather, it will be under the wings of the cross and under its arms."

-The Gospel of Philip

Knowledge of Self

It doesn't seem possible to many people that they don't know themselves, but the fact is that most of us only know part of what we truly are. We generally know little about our spiritual Self, and not as much as we think we know about our physical self. For example, most people don't know the health conditions of all the organs of their body. Nor do they know the fastest speed they can run or the heaviest weight they can lift. We might know the fastest speed we have run in the past, but we would probably run even faster if a bear were chasing us. Likewise, we may know the heaviest weight we have lifted under normal circumstances, but there are plenty of stories of people showing what is considered superhuman strength in an emergency, such as when their child is trapped under a car. As for knowledge of spiritual matters, most of us only have opinions on such things, not known facts gained by awakening and developing our spiritual Self.

Put on the Perfect Light

I think it is misleading to say that we should put on the perfect Light as if it is a garment that we wear on the outside only. In actual fact, when we are exposed to this Light, and learn how to take it in, it permeates every part, every organ, every cell of our physical body and our spiritual body as well. The Perfect Light is the Light that comes from God and reaches us through the intermediary of the Spiritual Sun. We might say that in a way, the Spiritual Sun is like a window between Heaven and Earth.

Philip says “ We must become perfect before leaving this world.” That is not exactly true, and probably not even possible. What is true is that we must start the process of becoming perfect by awakening and developing our spirits as much as possible while we are still in the physical world. Then the process can continue after the death of the physical body until we do reach perfection.

The Strong and the Weak

Philip tells us that the worldly people think that those who are “held in high regard” are considered strong, while those who are not are considered weak. He then tells us that in reality, the truth is often just the opposite. Those who have great power and esteem in the physical realm are generally weak on the spiritual side, while those who are spiritually strong, are not held in high regard in the physical realm. But the spirit is eternal, while the physical is temporary, so one who spends his life gathering esteem and wealth on the physical plane is gathering a treasure of shadows. The one who practices love, humility, and seeks eternal truth is the one who is ultimately strong in an eternal way.

**“Wild Star Discovered
Spinning an Incredible 716
Times Per Second”**

A dead star 27,400 light-years away appears to be having one of the most epic stellar discos we've ever seen.

In the binary system 4U 1820-30, a neutron star is spinning so fast around its center axis that it completes a breathtaking 716 rotations *per second*. No stars have been discovered spinning faster, and only the famous pulsar PSR J1748-2446ad has been found spinning at that speed.

“Mission to study the ‘dark side’ of the universe just revealed the first piece of

unprecedented map”

The powerful Euclid telescope has captured millions of stars and galaxies in a dazzling new mosaic – and it represents just the first piece of a massive puzzle the observatory has been designed to solve.

The European Space Agency mission, launched in July 2023, will create the largest and most accurate 3D map of the cosmos yet to help answer enduring questions about the “dark side” of the universe.
