

“Mysterious Antimatter Detection on ISS Sparks Radical New Theories”

Unofficial reports of 10 antihelium nuclei smacking into the International Space Station have inspired theoretical physicists to speculate beyond our current models in search of an explanation.

While a small handful of cosmic particles might appear trivial, the signature of the antihelium shower is strange enough for researchers to treat the event like a rainstorm in a desert.

Higher Worlds and Christ-Consciousness

“There are certain human beings existing who have evolved the higher powers of cognition in addition to the faculties of reason and feeling. It fell upon them to learn the facts of the higher worlds, and especially of the Mystery of the Christ-event by direct super-sensible perception. From these individuals there always flows into the souls of others as much as was intelligible and good for them.

“The first spreading of Christianity was to take place at a time when the capacity for super-sensible cognition was undeveloped in a great part of humanity. And this is why tradition at that time possessed such mighty power. The strongest possible force was necessary to lead mankind to a faith in a super-sensible world which they themselves could

not perceive. There were always those, however, who were able to rise into higher worlds through imagination, inspiration, and intuition. These people were the post-Christian successors of the old Initiates, the teachers and members of the Mysteries. Their task was to recognize again, through their own [spiritual] faculties, what man had been able to perceive through ancient clairvoyance, and through the methods of ascent into higher worlds taught in the old Initiations, and in addition to this, to acquire the knowledge of the real nature of the Christ-Event."

-Rudolf Steiner

Certain Humans

It is true that there have always been people who were predisposed to seek beyond the limitations of the physical realm for something higher and greater. In the earliest days of man, a majority of people had this ability, but as time went on, humanity became more densely material and less spiritual. This caused us to lose touch with God and the Spiritual realm. We have reached a point now where a large percentage of humanity doesn't even believe there is a spiritual realm or an afterlife of any kind. We have fallen so low that we must turn now and move back toward the higher dimensions of spirit or be trapped in matter forever.

Higher Powers

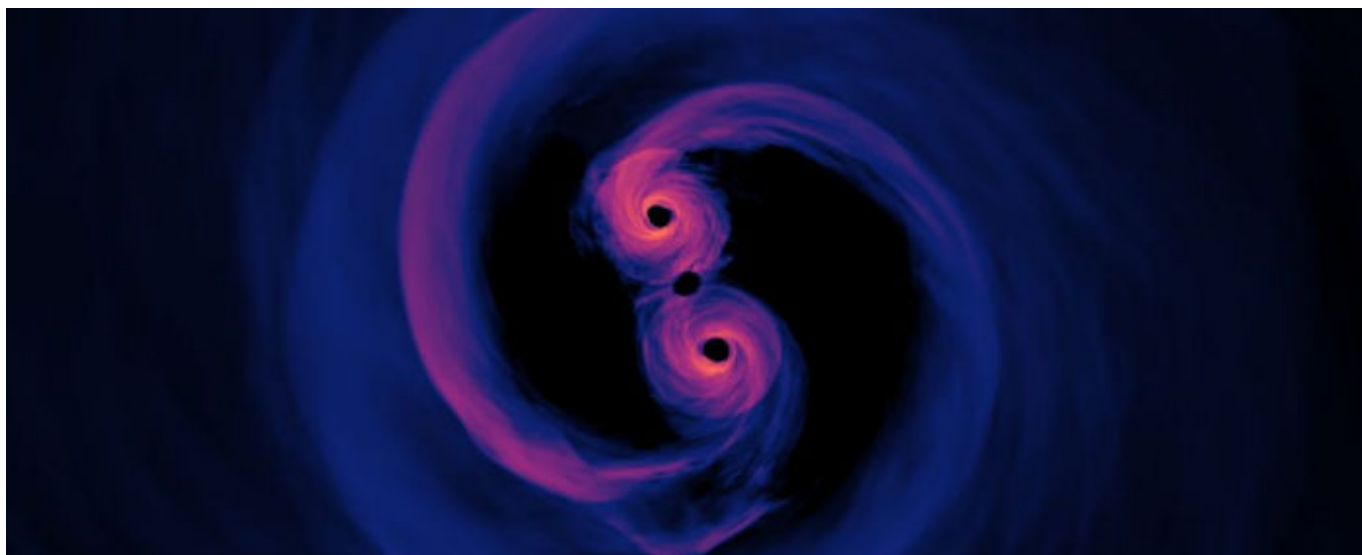

What Steiner is calling "higher powers of cognition," we would call today the development of our spiritual faculties, or spiritual Self. This is our Higher Self, our true Self that is permanent, as opposed to the temporary physical body and brain containing the faculties of reason and feelings.

Learn the Mysteries

It did fall upon those few who could learn the mysteries and awaken their higher self to do so and to teach others to do

the same. This is true today, perhaps more than ever before. We are in the Last Times, the times when God is changing the universe of matter back into Spirit. He has been doing it over many years to allow humanity to change with it. He isn't going to force us to change, though, because he gave us a certain degree of free choice. We must each choose to develop our Higher Self and reach for higher levels of Consciousness until we reach the highest level called Christ Consciousness. While the task is difficult because mankind, in general, has sunk so low into matter, we now have the promised Sun of Righteousness shining down upon us with the presence of God within it. The Light from this sun makes it easier for people to awaken and develop their spiritual faculties, but they still need guidance. That is why the Holy Child, Jamil, was sent into the world to start the new spiritual school of Cosolargy and the new Second Advent Church that will lead us into the new Golden Age of Light.

“Dark Matter Solves The Mystery of How Supermassive Black Holes Exist”

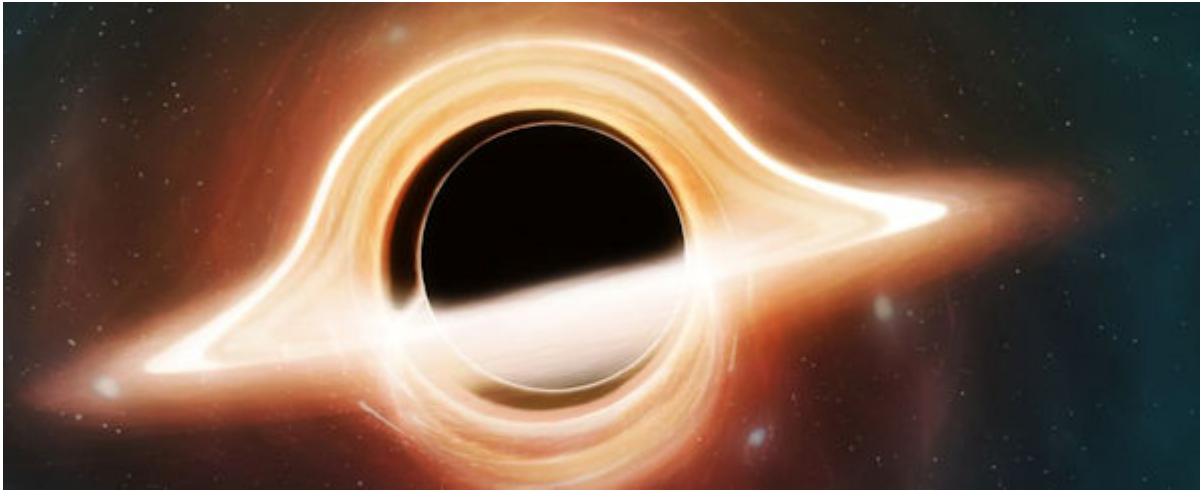

Dark matter could provide supermassive black holes the brakes they need to bring them crashing together at the end of a long, spiraling journey towards their destiny.

According to new mathematical modeling, a conundrum known as the final parsec problem can be resolved by the presence of particles of self-interacting dark matter that remain clustered around the black holes, allowing them to cross the final distance between them.

“New ‘Missing Link’ Black Hole Spotted Lurking in The

Galactic Center”

It seems that we’re finally locating at least some of the Universe’s ‘missing’ black holes.

A cluster of stars called IRS 13 near the center of the galaxy seems to harbor a black hole in its midst. Moreover, the way these stars swarm and orbit suggests that the black hole is a rarity – one in the middleweight mass range, between those that have a star-like mass and the supermassive monsters.

“Astronomers Reveal Stunning

Image of Baby Star Coming Into Existence”

Wherever the JWST looks in space, matter and energy are interacting in spectacular displays. The Webb reveals more detail in these interactions than any other telescope because it can see through dense gas and dust that cloak many objects.

In a new image, the JWST spots a young protostar only 100,000 years old.

The star is named L1527, and at this young age, it's still ensconced in the molecular cloud that spawned it. This is one of the reasons NASA built the JWST (with help from the ESA and the CSA.) The telescope can see through dust and gas to reveal the earliest stages of star formation.
