

Beings of Higher Consciousness

“Clairvoyant consciousness is able to learn something of what will happen during the Jupiter state. The beings and facts observed in this field of consciousness have not the nature of sense-images; they do not even appear as fine air structures from which effects might proceed which resemble

sense-impressions. They give **purely spiritual** impressions of sound, light, and heat. These are not expressed through any material embodiments. They can be apprehended only through clairvoyant consciousness. One may say, however, that these beings which at present manifest on the psycho-spiritual plane, possess a 'body.' This body, however, appears like a sum of condensed memories which they carry within their souls.

"One can distinguish within their being what they are now experiencing and what they have experienced and now remember. This last is contained within them like a bodily element. They are conscious of it in the same way that an earthly human being is conscious of his [physical] body.

"at a stage of clairvoyant development higher than just described as necessary for a knowledge of the Moon and Jupiter states, the student is able to perceive supersensible beings and things which are, in fact, the more highly developed forms of those present during the Sun condition, but which have reached stages of existence so lofty as to be quite imperceptible to a consciousness capable of observing the Moon forms only."

—[Rudolf Steiner](#)

Clairvoyant Consciousness

What Mr. Steiner calls "Clairvoyant consciousness," we in Cosolargy might refer to as simply "psychic consciousness" without specifying a specific psychic ability to associate with it. I won't bother to get into what he calls "the Jupiter state." Suffice it to say that what he calls "the Moon state" is the low level of the typical materialistic person on Earth. A higher state of consciousness associated with the psychic level of being, he calls "the Jupiter level," and still higher is the "sun level," or spiritual level. He also makes it clear that there are even higher levels of being and consciousness

than the spiritual level. We would call the highest level Christ Consciousness or Cosmic Consciousness.

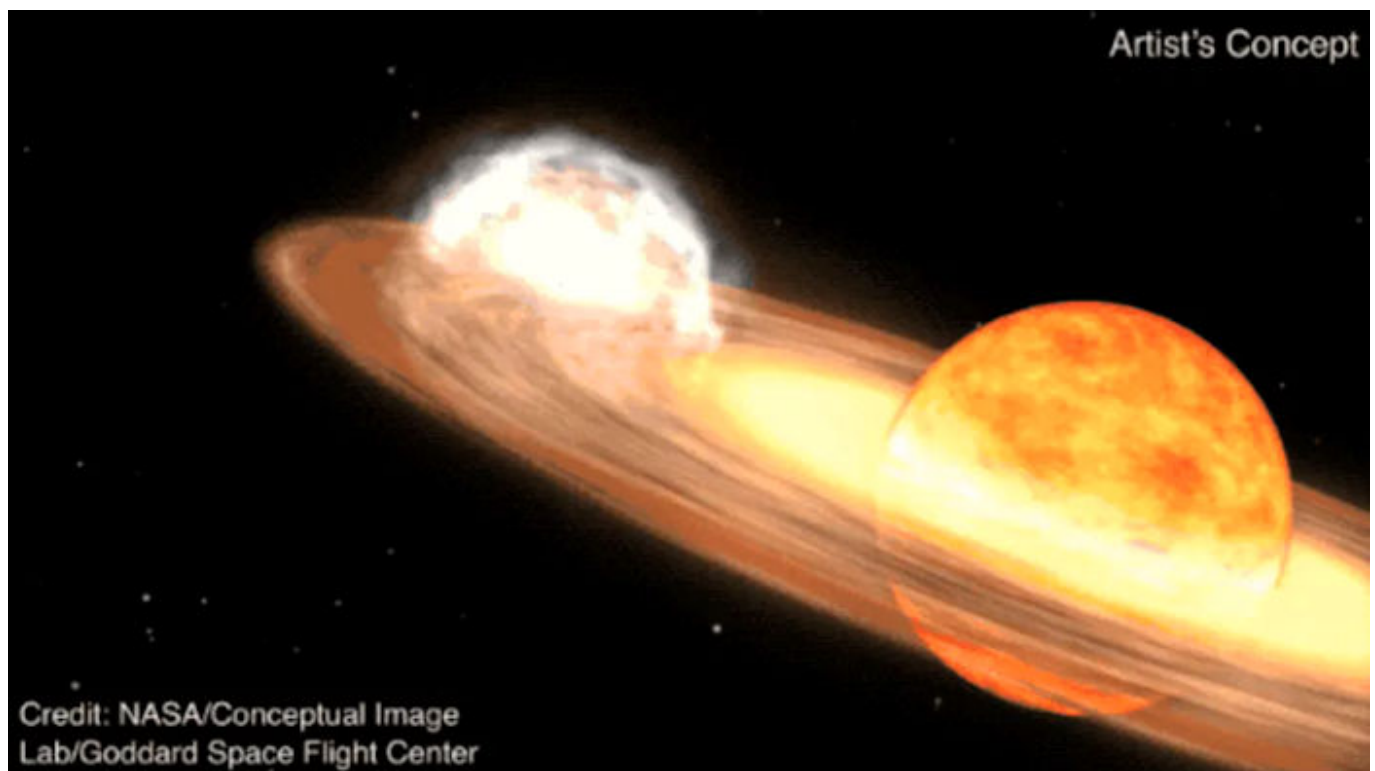

Purely Spiritual

Steiner says the beings that one might observe in a higher state of consciousness have “not the nature of sense-images.” In other words, they cannot be seen by the physical senses of the body, but must be seen by awakened psychic and spiritual senses. He adds that they give “purely spiritual impressions,” which makes sense as we are talking about spiritual beings. He adds that these beings do possess a body, but not one of matter. Steiner says their bodies appear “like a sum of *condensed memories*,” an odd description in my opinion as I have no idea what condensed memories would look like. I think it is better to describe the bodies of these beings as less dense than our physical bodies, and made of energy rather than matter. At the highest levels of consciousness, the beings found there would have bodies of brilliant Light and energy.

Supersensible Beings

Steiner goes on to say that beyond this Jupiter State, are even higher developed forms of the being found in the Sun State. This indicates that the beings of the Sun State are even more advanced, in a spiritual sense, than those found in the Jupiter State. This makes perfect sense to students of Cosolargy who know that there are beings that exist at all levels of reality, some good, some not good. In order to see and communicate with these higher-level beings, we must raise our own consciousness to their level. That is what the Solar Techniques of Cosolargy help us do.

“Extremely rare ‘stellar explosion’ will be visible to naked eye, will last for a week”

GREENBELT, Md. (WKRC) – As if the recent total solar eclipse wasn't enough, stargazers will now have another massive space event to look forward to.

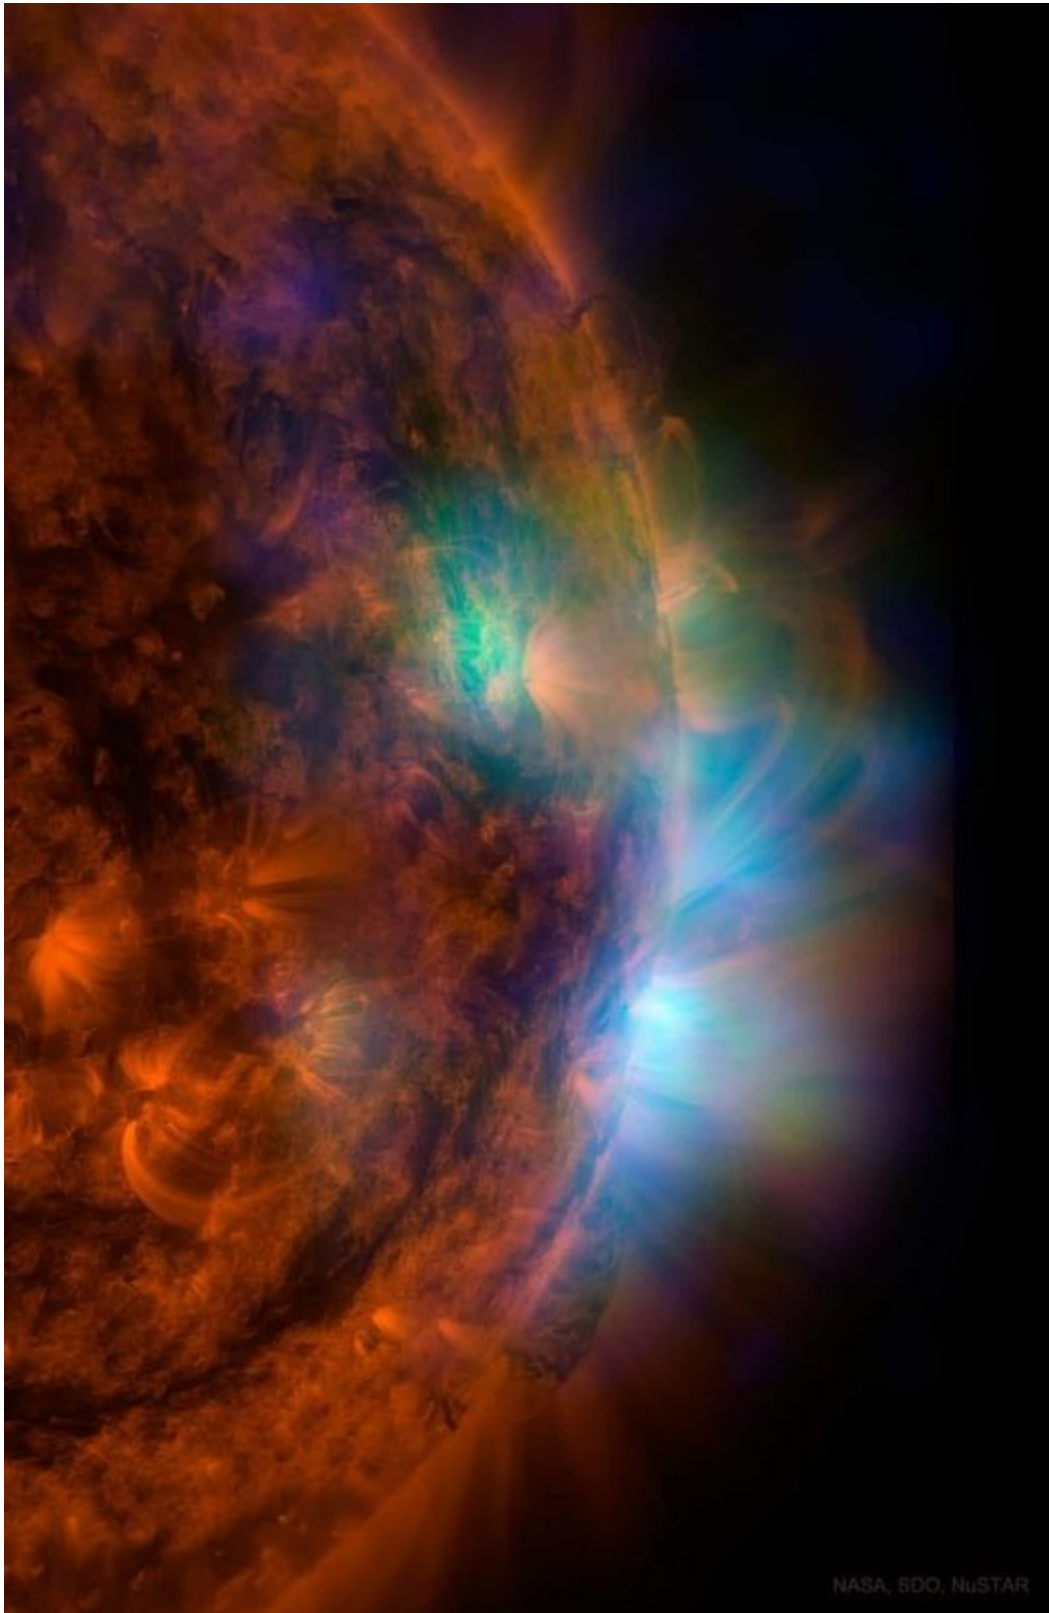

According to astronomers, the stars of T Coronae Borealis (T CrB), which is a binary system roughly 3,000 light years away, will be visible during an extremely rare cosmic event later in 2024, according to Space.

A rare nova explosion is expected to be visible for an entire

week. NASA currently says that the event could happen anytime between now and September.

“□□□ □□□ □□ □-□□□□ □□□□
□□□□□□”

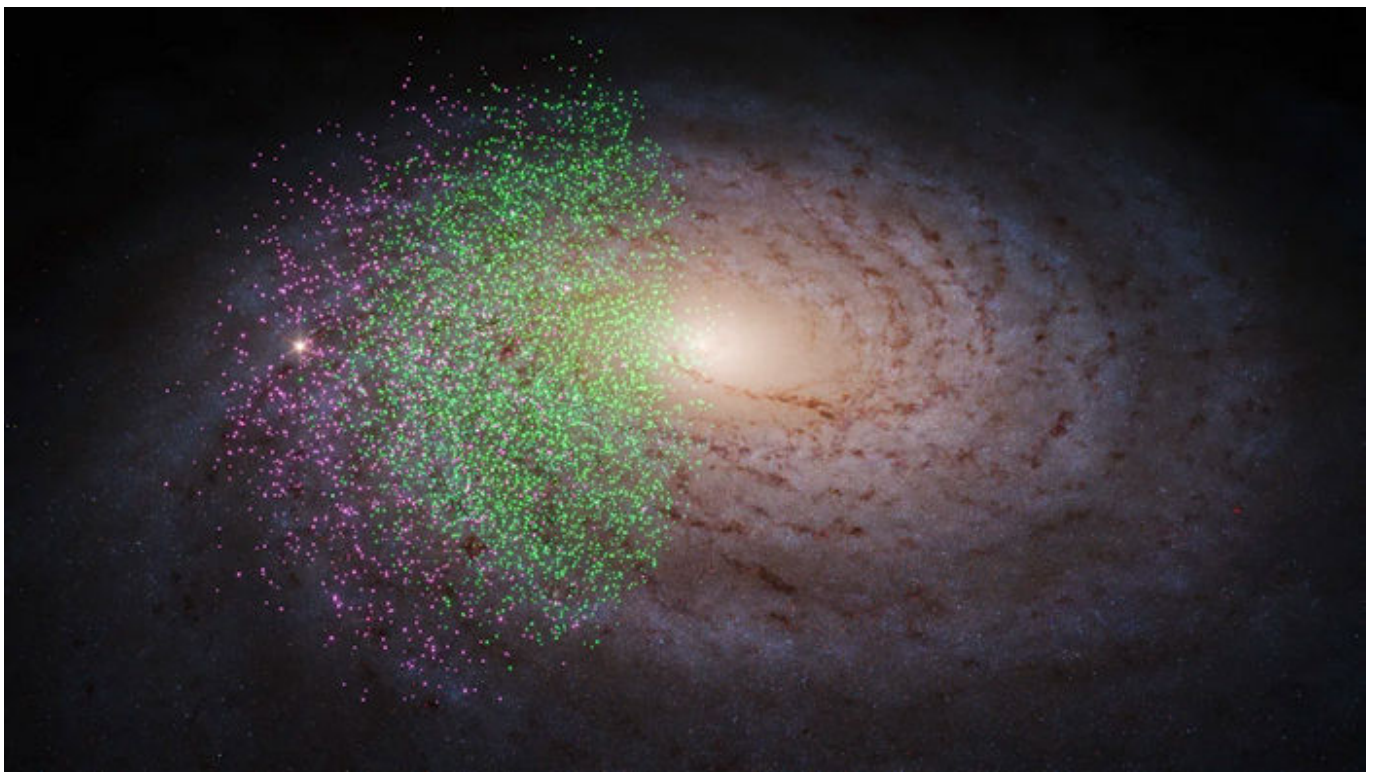

Why are the regions above sunspots so hot? Sunspots themselves are a bit cooler than the surrounding solar surface because the magnetic fields that create them reduce convective heating. It is therefore unusual that regions overhead – even

much higher up in the Sun's corona – can be hundreds of times hotter.

**“Two ancient star streams
that built early Milky Way
galaxy found | CNN”**

Astronomers have used the Gaia space telescope to spy some of the first building blocks of the Milky Way galaxy: two ancient streams of stars named Shakti and Shiva that helped our home galaxy grow and evolve more than 12 billion years ago.

Named after Hindu deities, the star streams appear to be the remnants of two galaxies that merged with an early version of the Milky Way between 12 billion and 13 billion years ago when the first galaxies were forming across the cosmos. The structures are so old that they formed well before the most ancient parts of the Milky Way's iconic spiral arms and central disk.

**Several Paths Lead to the
Great Road of Attainment**

“People are of varying temperaments, and that course that will best suit one will not meet the requirements of another. One will seek progress and development in one direction, and another in a different way, and a third by a still different course. The Yogi Philosophy teaches that the way that seems to appeal most to a person’s general temperament and disposition is the one best adapted to his use at the present time. They divide the Path of Attainment into three paths leading up to the great main road. They call these three paths, (1) Raja Yoga, (2) Karma Yoga, and (3) Gnani Yoga; each being a path leading to the Great Road. ...

“Raja Yoga is devoted to the development of the latent powers in Man and the gaining control of the mental faculties by the will—attaining mastery of the lower self—the development of the mind to the end that the soul may be aided in its unfolding. ...

“Karma Yoga is the yoga of work. It is the path followed by those who delight in their work, who take a keen interest in doing things with head or hand. ...

"Gnani Yoga is the Yoga of Wisdom. It is followed by those of a scientific, intellectual type, who desire to reason out, proving, experimenting, and classifying the occult knowledge. It follows a strong path towards metaphysics. Examples are to be seen in the great philosophers. As a matter of fact, all students of the Yogi Philosophy are attracted to Gnani Yoga to some degree."

-William Walker Atkinson

Varying Temperaments

It is true that people are of varying temperaments, and we must all start from where we are. The person who is still very materialistic may start by trying to think about and study things that are spiritual. The one who is, as Atkinson says, all wrapped up in his work and related accomplishments can start to do his work in a way that is more pleasing to God, although that will often mean that it is less pleasing to materialistic bosses and employers. The one who is scientific and needs to experiment and learn from experience is the most fortunate since this is really the beginning of the True Path. Atkinson calls this third path one of Wisdom, but I think that is an inappropriate name for it. It is more one of intellect than wisdom, and they are not the same thing.

Preliminary Steps

The important thing that Mr. Atkinson points out is that all of the three paths of beginners, which might be thought of as preliminary paths rather than true paths to enlightenment, all eventually lead one to the "Great Road," as he calls it. Many spiritual schools and Gurus tell people that there are many paths and we must each follow our own path, yet they provide little proof of that theory. A study of all the great spiritual leaders and enlightened individuals of the past will reveal that they all followed very similar paths, although their followers have often changed the truth in the written

books about them so they may seem to be different. Some anti-religious people love to point out on social media that many of the things that are written about Jesus can be found in earlier writings of the Hindus and others. This doesn't prove that the stories about Jesus are false, although some are. It proves that all great spiritual leaders follow a similar path.

The Great Road

The most important thing that Atkinson says in the quote is that all of the paths eventually lead to the One True Path that he calls "The Great Road". So it may be true that there are multiple paths, especially for beginners, but eventually, we must all get on the True Path to achieve real enlightenment. If you think about it, you will realize that if we are all going to be on that path eventually, it is a good idea to head to that route as soon as possible. The teachings of Cosolargy will put you on that path.

"Jupiter's stormy weather on display in new Hubble images"

- **New images of Jupiter** from the Hubble Space Telescope as the whole gas giant rotates. These images provide insights into Jupiter's stormy weather patterns.
- **Jupiter's weather is intense**, due to the fact that its atmosphere is tens of thousands of miles/ kilometers deep with no solid surface beneath. The thick Jovian atmosphere hosts big and little storms, including cyclones and anticyclones, some larger than Earth.
- **The new images show Jupiter's famous Great Red Spot**, plus what scientists call Red Spot Jr., a smaller anticyclone that brushes past the Great Red Spot about every two years.

“Possible Hycean world found by Webb telescope”

Meet TOI-270 d, a possible hycean world

- **Recent research suggests** that exoplanet TOI-270 d is likely a hycean planet – a world with a global ocean beneath a thick hydrogen atmosphere – located 70 light-years from Earth.
- **But another research team thinks the planet is too hot** to be considered *hycean*. Temperatures on its sunlit side might be as high as 7,200 degrees Fahrenheit (4,000 degrees Celsius).

“A Mysterious Wave-Like Structure in Our Galaxy Found to Be Slowly Slithering”

Gazing out upon the apparently unchanging sea of stars around us, it's tempting to think of the Milky Way galaxy as static and everything within it as fixed and immutable.

While the timescales on which our galaxy moves often defy human experience, move it does indeed.

Not all of these dynamic processes are easy to see. Just a few years ago, scientists discovered a huge, wave-shaped structure extending some 9,000 light-years in length snaking along a spiral arm of the Milky Way, just 500 light-years from the Solar System at its closest point.
