

**“Scientists may finally know where the biggest, oldest black holes in the universe came from”**

How do you build a giant black hole in the early universe? Start with the explosions of lots of little ones, a counterintuitive new preprint study proposes.

Numerous observations, especially with the James Webb Space Telescope (JWST), have revealed ironclad evidence that the young universe was populated by incredibly massive black holes. Although astronomers can't see the black holes directly, they do observe quasars – ultrabright objects powered by supermassive black holes.

**“‘Mind-blowing’ new images reveal 19 galaxies ‘down to the smallest scales ever observed’ | CNN”**

The James Webb Space Telescope has captured scintillating images of 19 spiral galaxies – and the millions of stars that call them home – in unprecedented detail never seen before by astronomers.

Webb's singular ability to observe the universe in different wavelengths of infrared light, such as near-infrared and mid-infrared, showcases the stars, gas and dust within the intricate structure of each galaxy.

## **A Quotation from the Prophet Isaiah (Chapter 60) with Commentary**

*"Arise, shine; for your light has come, and the glory of the Lord has risen upon you.*

*"For darkness shall cover the earth, and thick darkness the peoples;*

*but the Lord will arise upon you, and his glory will appear over you.*

*"Nations shall come to your light, and kings to the brightness of your dawn.*

*"Lift up your eyes and look around; they all gather together, they come to you;...*

*"Then you shall see and be radiant; your heart shall thrill and rejoice, because the abundance of the sea shall be*

*brought to you, the wealth of the nations shall come to you... and shall proclaim the praise of the Lord.*

*“Your gates shall always be open; day and night they shall not be shut, so that nations shall bring you their wealth.*

*“For the nation and kingdom that will not serve you shall perish; those nations shall be utterly laid waste.*

*“I will appoint Peace as your overseer and Righteousness as your taskmaster.*

*“The sun shall no longer be your light by day, nor for brightness shall the moon give light to you by night but the Lord will be your everlasting light, and your God will be your glory. Your sun shall no more go down, or your moon withdraw itself; for the Lord will be your everlasting light, and your days of mourning shall be ended.”*

*-Isaiah 60: 1 – 6. 11 – 12, 17. 19*

## **Your Light has Come**

Isaiah is talking about the spiritual Light of God that comes to us through the intermediary of the Spiritual Sun. We don't know who Isaiah was talking to, but now that we are in the End Times and the time of the Sun of Righteousness, we can assume that he is talking to us.

## **Darkness Shall Cover the Earth**

There are different kinds of darkness, physical darkness and mental darkness. We are experiencing the latter kind quite a lot these days. With wars, plagues, tornadoes and floods, etc. it seems like the world is full of darkness. We must remember, though, the old saying, “It is always darkest before the dawn.” We are seeing a lot of darkness in the world, but we are also seeing people awakening to the Light, in small numbers, but growing all the time.

## **The Lord's Glory Over You**

The Glory that has appeared over us is the Sun of Righteousness predicted by the prophet Malachi, among others in different faiths.

## **Nations come to Your Light**

This hasn't happened yet, but it is in our prophecies that our community will one day be recognized for its importance in the complete development of mankind, and political leaders, as well as business leaders, will come to us for advice and guidance.

## **Your Gates Will Be Open**

We will be open to helping all the nations all the races, all the religions of the world to unite and live together in peace and harmony.

## **Your Sun Shall Not Go Down**

The Sun of Righteous, being the Spiritual Sun with the addition of God's presence in it, never goes down because it is spiritual and not subject to the limits of time and space. While it is convenient for us to think of the Spiritual Sun as being in the same location as the Physical sun, the Spiritual Sun is not limited to that location. In fact, many Cosolargy students sometimes find when doing their daily solar techniques, that as they are finishing, they find they are looking at an area some distance away from the physical sun. That is perfectly fine, as once again, the Spiritual Sun is everywhere.

# **“Astronomers solve mystery of ‘odd radio circle’ in deep space”**

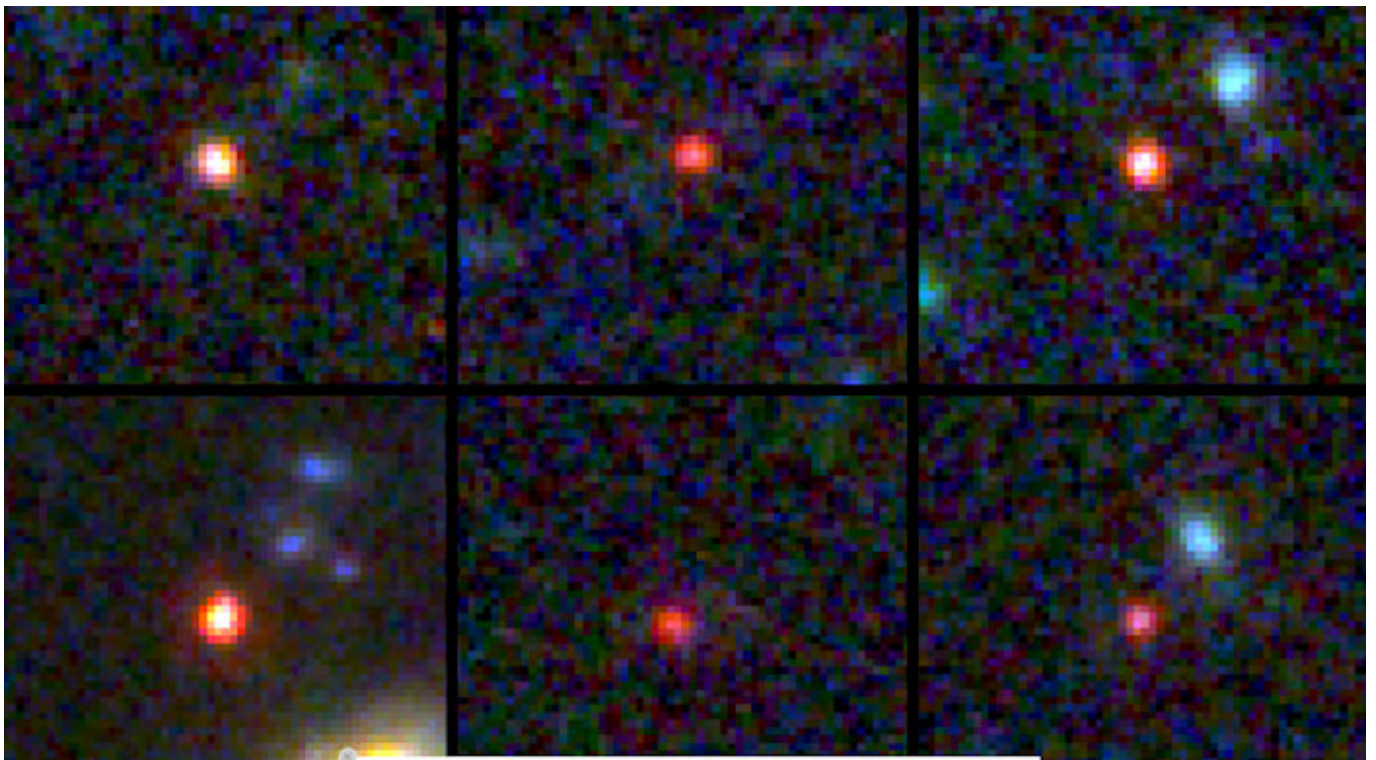

Since 2019, astronomers have puzzled over odd radio circles (ORCs), curious rings that pop up in sky surveys at radio wavelengths. At least one of the rings was likely caused by a burst of stars that formed in a distant galaxy and then exploded, blasting gas out into surrounding space, a team of astronomers told the American Astronomical Society meeting in New Orleans today. When that gas hits slower moving gas around the galaxy, it created a shock wave that generated an eerie ORC more than 10 times as wide as the Milky Way.

**“These 6 galaxies are so huge, they’ve been nicknamed ‘universe breakers’”**

Using the first dataset released by the James Webb Space Telescope (JWST), an international team of scientists have discovered something surprising— evidence of six massive galaxies that existed during the early days of our universe.

“These objects are way more massive□ than anyone expected,” said Joel Leja, an astronomer and astrophysicist at Penn State University, in a statement. “We expected only to find tiny, young, baby galaxies at this point in time, but we’ve discovered galaxies as mature as our own in what was previously understood to be the dawn of the universe.”

# **“The Running Chicken Nebula shimmers in new ESO image”**

A nebula can look like a lot of different animals—a crab, tarantula, seagull, a cat’s eye, and even a chicken on the run. The European Southern Observatory’s VLT Survey Telescope in Chile took a new 1.5-billion-pixel image of IC 2944 aka the Running Chicken Nebula. It is located roughly 6,500 light-years away from Earth in

the constellation Centaurus and this new image shows the nebula in new detail.

# Climbing Mount Thabor

*“So that the name of Christ may be exalted and glorified in us, we should follow him up the mountain of our bare intelligence, even as Peter, James, and John followed him up Mount Thabor. Thabor means in our tongue an increase in light. So soon as we are like Peter in the knowledge of truth, and like James in overcoming the world, and like John*

*in fulness of Grace possessing the virtues in righteousness; then Christ brings us up onto the mountain of our intelligence to a hidden solitude, and reveals himself to us in glory and Divine Brightness. And, in his name, his Father in Heaven opens to us the living book of His Eternal Wisdom. And the Wisdom of God enfolds our bare vision and the simplicity of our spirit in a wayless, simple fruition of all good without distinction; and here there are indeed seeing and knowing, tasting and feeling, essence and life, having and being: and all this is one in our transcendence in God. And our heavenly Father endows each of us according to the nobility of his life and his practice. Therefore, if we ever remain with Christ on Mount Tabor, we will continue to experience a growth of new Light and new Truth, for we should forever hear the voice of the Father."*

*-John of Ruysbroeck*

## **Glorified in Us**

Actually, in most places where it says "Christ" in the quote above, it originally said "Jesus," but it was obvious from the context that Ruysbroeck meant Christ, so I changed the wording for clarity. It is Christ, a spiritual Being and true Son of God who should be exalted and glorified in us. This does not mean that we should worship Jesus or even Christ. It means that we should try to awaken our own spiritual consciousness with the goal of eventually reaching the highest level called Christ Consciousness. This cannot be done instantly, or even in a week or two. It takes years of practice and gradual change to climb up the many levels of consciousness until we achieve Christ Consciousness, or, using the analogy Ruysbroeck used, it takes years to climb to the top of Mount Tabor, the mountain of Light. So to follow Jesus, Peter, James, and John up Mount Tabor means that we should gradually increase our own Spiritual Light and in doing so, develop our spiritual faculties.

## **Peter, James, and John**

According to Ruysbroeck, Peter, James, and John, each represented certain attributes or desirable traits of a true spiritual seeker. Peter represented Knowledge. Not the knowledge gained from books, or attending a government-approved school system, but the Divine Knowledge that is only revealed to the awakened and developed Soul. James, according to Ruysbroeck, was known for “overcoming the World”. He was one of the most spiritual of the apostles and an actual brother of Jesus (Mary had more than one child). John was full of grace and the “virtues in righteousness”. Those virtues are love, peacefulness, and humility which we must all develop.

## **Hidden Solitude**

One problem with Ruysbroeck is that he doesn't seem to recognize the difference between intellect and consciousness, but that is not surprising for the times when little was known about the brain, mind, or consciousness. In any case, there is a “Hidden Solitude” that we can get to by practicing our spiritual development techniques regularly and conscientiously. In this hidden solitude, the true Knowledge (Gnosis) is revealed, perhaps slowly at first, but eventually in its entirety.

## **Transcendence in God**

There is only one real transcendence and that is transcendence in God. Gaining intellectual knowledge is not transcendence. Gaining psychic knowledge and abilities is not transcendence. Those things may be steps on the path for many people, but it is only when we climb to the top of Mount Tabor and become one with God do we truly transcend. Some people fear this transcendence because false schools have spread the idea that once we become one with God and one with The All, we completely lose our individuality. They compare it to a drop of water joining the sea and becoming completely mixed, but that is not how it happens. It is more like a grain of sand

dropped on a beach that is now one with the beach, yet still  
an individual grain of sand.
