

“This Supernova Progenitor Hid Behind a Surprisingly Thick Veil of Carbon Dust”

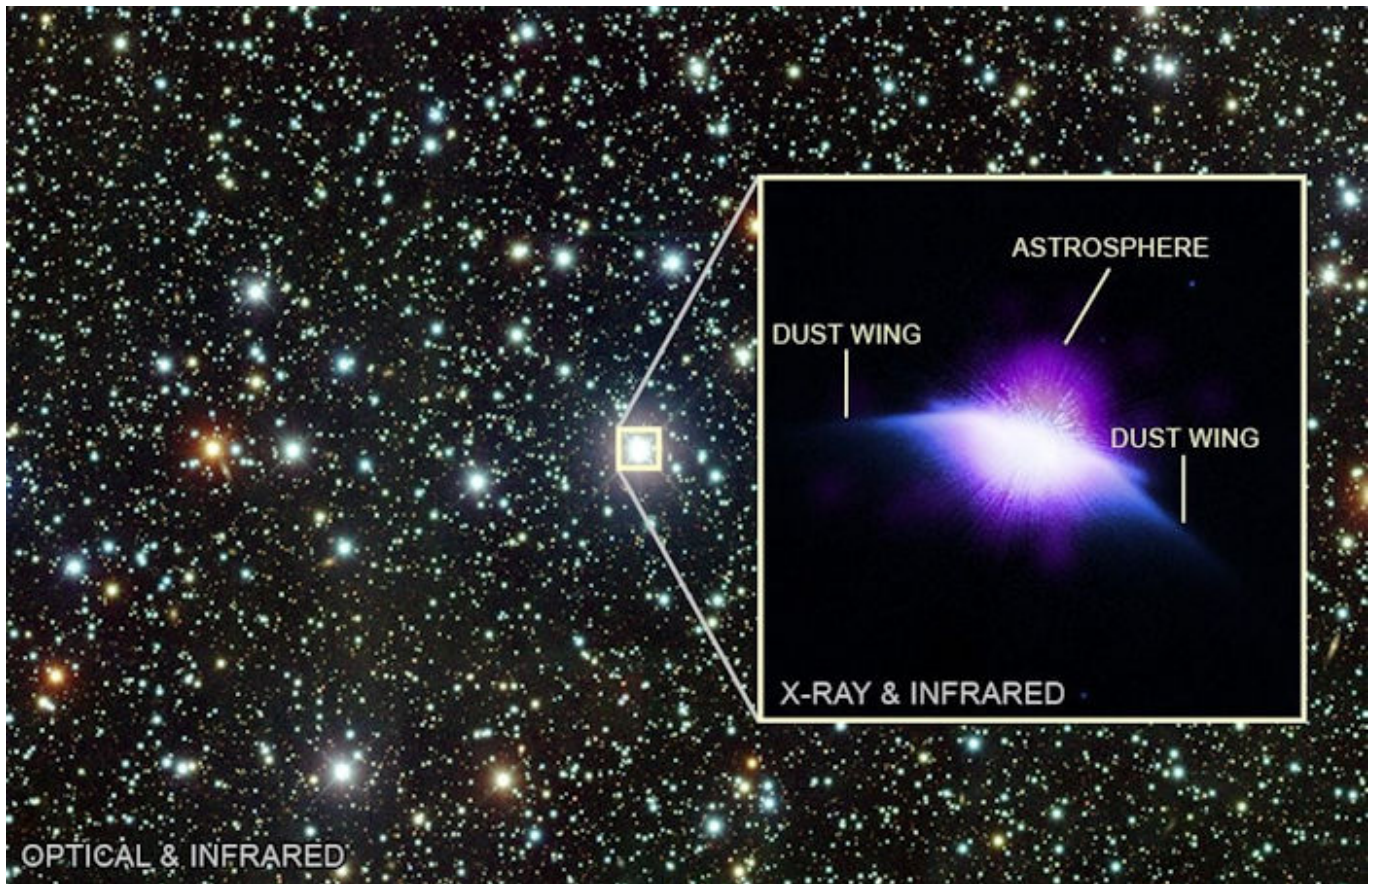

Supernovae are bright. So bright that they can outshine all the other stars in their galaxy for months. But sometimes their precursor objects are hard to spot, hidden behind thick shrouds of gas and dust. Astronomers used Webb to observe a Type II supernova in the galaxy NGC 1637, located about 30

million light-years away. They looked at archival data and found a red supergiant star in the exact same location as the supernova. So now Webb has shown the before and after, the final moments of a star before it explodes as a supernova.

“NASA Telescope Spots a Young Sun-Like Star Inflating Its Astrosphere”

Stars are constantly emitting radiation and stellar winds which can shape their surroundings. If those winds are powerful enough, they can even prevent other stars from forming. Astronomers have observed a young star blowing out a bubble around it, filled with hot gas. Our Sun's bubble is called the heliosphere, so this would be called an "astrosphere." The star's wind is about three times faster than the solar wind, 25 times more dense, and might be a good example of what the Sun looked like early on.

“Milky Way and Andromeda held in dark matter sheet”

It's well known that the Andromeda Galaxy is moving toward us. But most other large, nearby galaxies are moving away, despite the gravitational pull of the Local Group (the Milky Way, Andromeda and a host of smaller galaxies). Why? Astronomers now think they have the answer.

New simulations suggest the Local Group is trapped inside a 32 million [light-year-long](#) sheet of dark matter.

**Before Creation only God
Existed**

“About the days of Nun, we have no knowledge. Before creation commenced there was the One Father/Mother Being and from this Divinity came the heavenly Twins. From these were born three, and the three became many. Thus, even in the beginning it was divinely ordained that brother and sister might be wed. From the first Heavenly Twins were born those whose destiny it was to be eternally married. For theirs was the divine right of eternal and undying love, a love unknown to mortals, but to which, if they would be more than mortal, they must aspire. This love is the Light of Life, the Light of the Earth, the Sun of the Spirit.”

“The Originating Divinity is called many names among men, and in Egypt His names are hidden in other names. Among the Chosen Ones, He is called The Craftsman Creator, but men and women name Him differently among the people. Likewise, some say ‘Him’ while others say ‘Her;’ it is all alike, for these are no more than the words and distinctions of mortal man. Heaven is the sphere of God, the true abode of His Spirit in essence. There is the Heaven above, which is the High Heaven,”

and the Heaven below, which is the reflection of the High Heaven. The true Center of God is in Newit."

-The Kolbrin Bible (MAN:33:7-8)

Before Creation

Before creation, God was the only thing that existed. God has always existed, and always will. The quote refers to God as "Father/Mother", which is accurate. God is unlimited, so to think of God as being only male or only female is putting limits on God.

Heavenly Hierarchy

The quote says that from the one God came the heavenly twins. From the twins came three, then five, then ten, and so on. This established a Heavenly hierarchy of Light Beings. These Light Beings, or angels, were 100% spirit. It was only later that some descended into matter, becoming the fallen angels. While the quote says it was ordained "brother and sister might be wed," this doesn't mean literally that one should marry their brother or sister. It means that a male should marry a female. That, however, is not necessarily God's Law, but it is the law of the people who wrote this section of the Kolbrin Bible.

Eternal Love

Eternal Love is not only the divine right of the Heavenly Twins, it is also the divine right of all of us. God's love for us is eternal, and our love for God should be eternal and unlimited also. When we develop that kind of love, we will also love all people, regardless of their race or creed. We will love all beings, including animals and plants. We will love all of creation, even the distorted part created by the Demiurge, for it too is one with God, and will eventually return to that condition.

Light of Life, Sun of the Spirit

The author of this part of the Kolbrin Bible knew that God is Light, and that God's Light flows to us through the Spiritual Sun. Now that we are in the End Times, that Light is the Sun of Righteousness, which grows stronger every day and is helping in the process of converting matter back into Spirit.

Heaven

Heaven can be called the center of God, the highest level of consciousness, or the One. It is all the same. I can find no other reference to "Newit", but it either refers to Heaven or the Godhead. We don't need to confuse ourselves with the names men give these things; just know that the goal of spiritual development is Oneness with all and universal Love.

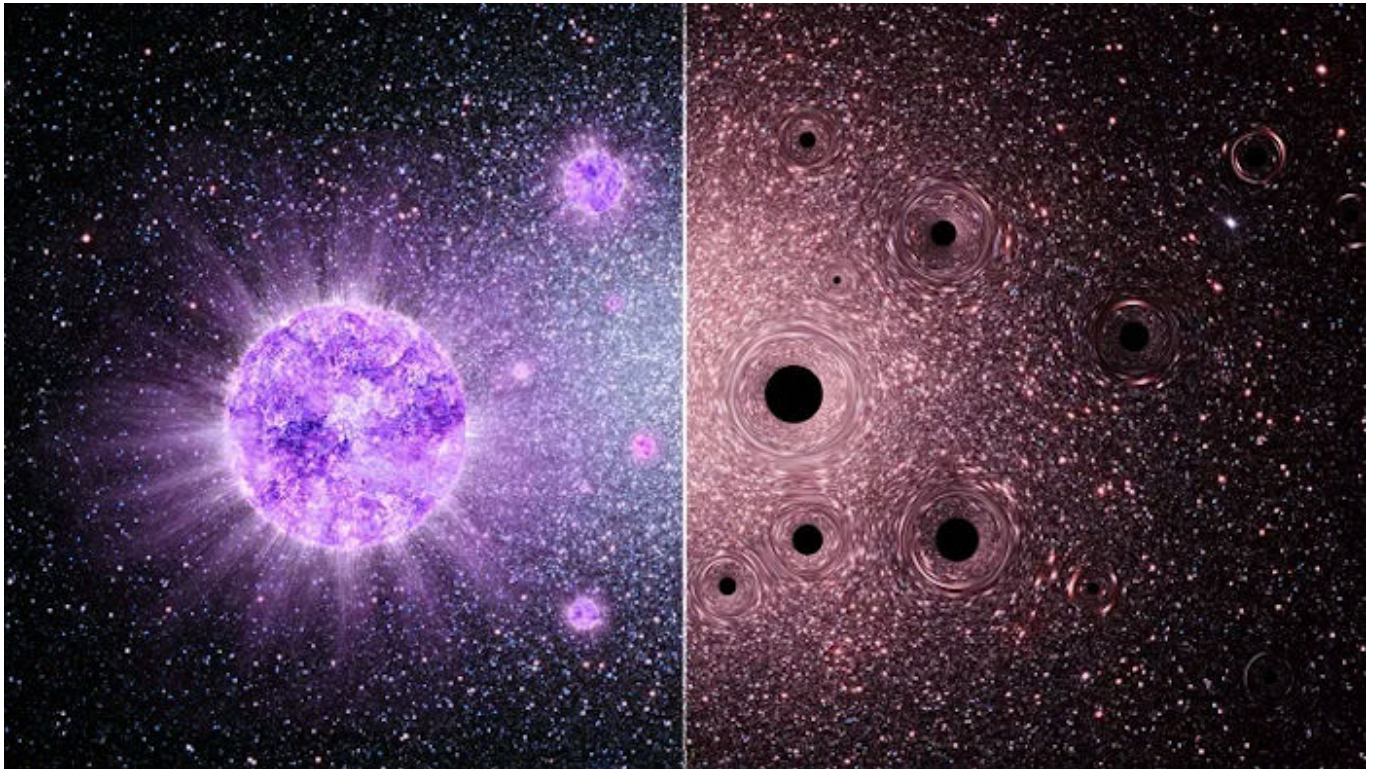

"How Supermassive Black Holes Stifle Star Formation In Neighbouring Galaxies"

Astronomers know that supermassive black holes (SMBH) can inhibit star formation. These behemoths, which seem to be present in the center of large galaxies like ours, inject energy into their surroundings, heating up star-forming gas. Gas needs to be cool to collapse and form stars, so active SMBH put a damper on the process.

**“Ancient Massive Stars
Enriched Early Clusters and
Birthed First Black Holes”**

The early Universe was a dramatically different environment than what we have today. The first stars formed from the primordial hydrogen and helium left over from the Big Bang and could have grown to immense sizes, living short lives and detonating as supernovae. In a new paper, researchers looked at what could have happened when stars with more than 1,000 times the mass of the Sun could form, and the impact they'd have had on their surroundings.

“The Galaxy Cluster That Grew Up Too Fast”

Our current models of the Universe assume that large galaxy clusters were built up slowly over time, piece by piece from individual galaxies bound together by gravity. They should take billions of years to come together, but a new observation from JWST and Chandra found a galaxy cluster that was already assembled just a billion years after the Big Bang. At this relatively young age it had already assembled 20 trillion times the mass of the Sun.
