Reno Faith Forum Presents Bishop Savoy's Words

Gene Savoy Jr.

The "Faith Forum" in the Reno Gazette-Journal has been inviting local Reno clergy to present their views on controversial topics for the past two years. Views of major religious denominations as well as secular academics have been posted weekly in this Saturday column since 2011. For the first time in these two years, Bishop Gene Savoy Jr. was invited to present his view alongside those of local Eastern Orthodox, Bahai, Evangelical Christian, Jewish, Muslim, Roman Catholic, Buddhist, LDS, and religious scholars.

This is the question posed in the Faith Forum for April 21, 2013:

American philosopher Dr. Daniel Clement Dennett III stated, according to the BBC website, that "religion is a bad virus ... a lot of people are really afflicted by their religion and I would love to see them cured ... it is a drug that you take and ingest by the eyes and ears." What do you think?

Here is the posting of Bishop Gene Savoy Jr's response:

RELIGION MUST BE PROGRESSIVE

**Gene Savoy Jr., International Community of Christ Bishop,
guest panelist**

The nature of religion is the key to this question. Religions are founded as dynamic and charismatic movements by inspired and holy figures ordained of God who have been chosen to receive new prophetic or revelatory information that offers fresh perspectives and insights into man's spiritual quest to know the divine. Such was the case with Abraham when he established a new Covenant in Canaan, with Gautama Buddha when he adopted the Middle Way, and with Jesus the Christ.

If the original teachings of religious movements are lost, watered down or become dogmatic, then religion suffers stagnation. In these cases, religion might hamper rational thought as it no longer serves the spiritual needs of an ever-evolving human species. Then, religion becomes stuck in the past. If, on the other hand, religion remains vibrant, evolutionary and progressive, then, to the contrary, religion serves to elevate the thought of man and woman.

The Sun is the Central Heart

PHOTO: Stephan Fuelling

The psychic fair held at the Reno Convention Center on Saturday October 13 and Sunday October 14 provided a venue to use for outreach. The Right Reverend Sean Savoy presented a free workshop each of those days from 2:00 to 3:00 PM called "The Sun is the Central Heart." Here are some of the questions and comments proposed in the invitation and the advertisement:

How can we work with the light/energy of the Sun? How do we

put ourselves in tune with higher intelligence and with our own spiritual self? We can activate our inner light and participate in cosmic Consciousness by working with solar techniques that allow us to transcend the physical dimension. Can you see your golden, fully charged light body? Can you experience its Consciousness? Learn how to start the process of activating your solar body and expanding yourself—the mind as well as the heart—for union with the cosmos.

The Sun is the beating, living center of our solar system, and the connecting point between our personal spiritual natures and cosmic spiritual energy, also known as God-Consciousness. It is the Sun, the Christ Force, that mediates between humankind and God.

“An Ungodly Predicament”

PHOTO: newsreview.com/reno

In the September 2012 issue of *Reno Tahoe Tonight* (RTT) magazine, Sean Savoy uses his monthly editorial column to mildly take to task the author of a pro-atheist opinion piece that appeared as the feature article in the popular free weekly magazine *Reno News & Review* (RN&R).

That critical and judgmental piece, titled “Are You There, God? It’s Me, Jake,” by longtime University of Nevada-Reno professor of journalism Jake Highton, addresses the pretenses and hypocrisy of modern-day religion and at the same

time wags a finger at the moral foibles of famous professed believers whose behaviors, he believes, prove to him their moral hypocrisy. Professor Highton's article begins with the childhood trauma that convinced him that God did not exist, then hops from eighteenth-century deistic points to ancient and modern atheistic points to contemporary scientific points, and ends with the arguments that all religion and all concepts of God defy reason, that modern empirical science alone is reasonable, and that the most morally decent nations are the most secular.

Bishop Savoy, in his article, recognizes the correctness of Professor Highton's stance when the professor makes solid arguments and promotes an intelligent and more reasonable spiritual perspective when the professor does not.
