

Fire Sweeps Rectory-Abbey

Bishop Gene Savoy Jr. surveys the area after the fire subsided PHOTO: Sylvia Ontaneda

In mid-June a fire referred to as the Driscoll Fire swept by the Rectory Abbey, the residence of Bishop Gene Savoy Jr. and his family. Fire damage was kept to a minimum in the interior of the building, where only one wall actually burned through. However, smoke damage did occur on all floor levels of the residence. All the magnificent trees that once surrounded the Rectory were destroyed by the fire as well as much of the landscaping.

Burnt-out trees along the Rectory entrance PHOTO:
Sylvia Ontaneda

Insurance did not cover all the interior damage and covered none of the landscaping. Your pledged donation can help replace trees, plants, and shrubs as well as help complete necessary interior repairs. You will be receiving a pledge request from Reverend Mother Elizabeth Reece in the near future, if you have not received one already. Please help with the repairs!

RC Gary Buchanan

**Gary Buchanan Speaking at
International Water
Conference**

Reverend Canon Gary Buchanan will be in Sofia, Bulgaria October 6-9, 2016 to speak at the 11th Annual Water Conference. He will be speaking along with Dr. Gerald Pollack, an old colleague of his who has gained fame in recent years for his theory of fourth-phase water, and who is chairing the conference, and along with several Nobel Prize laureates. Rev. Buchanan's work on Sonotherapy and his use of water to form archetypal cymographs made him a candidate for speaking at this prestigious international conference. In fact, his cymographs have gained so much interest that the conference organizers are using his cymographs on their Facebook page and throughout their newsletter.

Use the links below to find more information on the conference and to follow the conference live or streaming on Facebook.

Follow this link to the web site of the 11th Annual Water Conference:

Follow this link to the participants list where Rev. Buchanan is listed, and where you can read more about his research and the talk that he will be presenting at the Water Conference:

<http://www.waterconf.org/participants-materials/2016/>

Here is the link to the Facebook page where you can follow the conference live or streaming:

<https://www.facebook.com/waterconf/>

Rev. Buchanan will be speaking from Sofia, Bulgaria on Sunday, October 9, 2016 from 10:10-10:45 AM, which translates to 12:12 AM October 9, 2016 – 10 hours earlier.

His talk is titled “SONATHERAPY®, CYMATICS, AND PHONON CHAINS: The Healing Potentials of Sound in the Body’s Vicinal Waters.”

**Here comes “Here Comes the
Sun”!**

Cover of the new book
“Here Comes the Sun” by
Academy Consociate Paul
Vernon

Academy Consociate Paul Vernon has just completed his second full-length book *Here Comes the Sun*. The book is available for sale in ebook and kindle format on the Smashwords web site, where you can read more about the new book and read a 6000-word sample for free.

[Visit the *Here Comes the Sun* page at Smashwords.com to buy a copy or read a sample.](http://Smashwords.com)

Here is how he introduces his new 40,000-word volume:

“It is time to see the Sun in a new light and elicit its secrets. Today there is resurgence in the practice of Sun-gazing, along with the therapeutic use of Sunlight and colour.

While the Sun's benefits in providing vitamin D and aiding in the healing of depression have been known for some time, there are new revelations in 2016 that it prevents myopia and slows its advance. It is less well known that human biology reacts in a very direct way to the rotations of our star. A number of prominent doctors have come out to publicly endorse the absorption of Sunlight in the human eye and skin, using common sense to avoid over exposure.

"In the scientific field during 2016 researchers are making new discoveries about the ways our planet is intimately connected to the Sun by invisible strings, and the real impact it has on our weather patterns and climate change. Quantum physics shows there may be corresponding connections on a different dimensional level that result in wormhole-type tunnels that bridge our earth to the Sun and beyond.

"Historically the star of our solar system has been honoured by the construction of megaliths such as Stonehenge and Glastonbury in England, Nabta Playa in Egypt and the Temple of the Sun in Mexico. Now alternative researchers believe there is evidence that solar power was harnessed and distributed in structures such as the pyramids and that giant obelisks such as the one at Abu Gurab were actually electrical transmitters. The concept and application of this fits perfectly with the theories of the 20th century genius Nikola Tesla. Great leaders in ancient Egypt, Greece and Rome were guided by mystical activities based on what may be called the solar sciences, and their traditions survive today within certain secretive societies.

"Authors such as James Redfield have suggested that the human body may be destined to evolve into what is known as a light body, and this is now supported by scientific research into matter being constructed of photons. Along with modern technology's steps towards transhumanism and artificial intelligence, we are witnessing the emergence of a new breed of humans referred to as Indigo children and the Super Psychic

kids. Modern day organizations such as Cosolargy suggest that the transmutation can be accomplished by the intake of the Sun's rays. [emphasis added]

"Spirituality has a role to play in our reconnection with the sun and the technique of 'Incubation' as practised by the ancients, called the Way of the Iatromantis, provides an avenue in the pursuit of activating our light bodies and making the next evolutionary step. In rethinking our relationship with the Sun, we see a way forward into a future filled with light."
