

“Dark Matter Could Color Our View of the Universe”

Dark matter has two central properties: it has mass like regular matter, and unlike regular matter, it reacts weakly or not at all with light. Neutrinos satisfy these two criteria, but neutrinos move through space at nearly the speed of light, making them a form of hot dark matter. The observations we have suggest that dark matter is cold. There also aren't enough neutrinos to account for all of dark matter, so we know dark matter isn't made of neutrinos. No other known particle meets the criteria, so we have no idea what dark matter might be made of. Cue the theoretical physicists.

“Xrism catches a Pulsars Cosmic Wind and sees a Surprising Result”

The Universe is a strange place. The X-ray Imaging and Spectroscopy Mission (XRISM) orbiting observatory recently highlighted this fact, when it was turned on a pulsar to

document its powerful cosmic winds.

The XRISM observatory is a joint mission for NASA, the European Space Agency (ESA), and the Japan Aerospace Exploration Agency (JAXA). The mission was also a replacement for the ill-fated Hitomi X-ray observatory, which failed shortly after launch in 2016.

“A wormhole from another universe? Scientists revisit the puzzling black hole GW190521”

In May 2019, astronomers picked up something strange in the fabric of spacetime. The LIGO and Virgo detectors recorded a gravitational wave that lasted just one-tenth of a second. The signal, known as GW190521, was unusual straight away because it didn't look like the normal "chirps" usually produced when two black holes orbit one another before colliding. Instead, it sounded like a cosmic crack.

The Wise Man Has Doubts, The Fool Never Does

**A wise
man never
knows all;
Only a fool
knows
everything.**

-African Proverb

fb/david avocado wolfe

"The wise man is less presumptuous than the fool. He has many doubts and changes his mind, for as wisdom grows, knowledge alters."

"The fool fixes his mind in obstinacy; he is stubborn, and doubt does not disturb his placidity. He knows all things, except his own ignorance. The wise man is aware of his imperfections and continually strives for improvement. The fool forever counts his own small talents and is content. He boasts of his achievements in things which are of no account."

“Thistledown floats on water for all to see, but a gemstone sinks below the surface. So does the fool shout his abilities to the wind, while a wise man keeps them hidden within himself. The goose brings forth its egg while at rest, and the tail of the peacock is displayed while it stands still. The deep, still pool holds the biggest fish, and the resting cow gives the most milk. So it is with the quiet man, who within himself, produces a fountain of strength at which lesser men drink and find refreshment and courage.

“The heart of a fool flutters at a vain hope, but the wise man puts it behind him. Fools snap at one another, but wise men agree in peace.

“Let reason rule all your desires, and let not your hopes reach out beyond the limits of probability. Thus, the chances of success bear down in your favor in the scales of fate, and your heart will not be burdened with disappointment.”

-The Kolbrin Bible (MPR:20:15-19)

Changes His Mind

When a wise man or woman is presented with new information about something they thought they knew, they are willing to listen and change their mind when appropriate. They do have to consider the source of the information. If the source is unreliable, then so is the information.

Obstinate Fool

The fool, on the other hand, stubbornly sticks to his beliefs no matter how much evidence there is to the contrary. He also does not consider the source of the information, and accepts statements from dubious sources.

Imperfections

The wise person is aware that they are not perfect (nobody

is), so they strive for improvement. More significantly, the wise person seeks improvement in their spiritual Self, not just the physical. The fool rarely seeks improvement, and when they do, it is in physical matters that are far less important than spiritual growth.

Floats on Water

The fool loves to brag about his abilities, even if they are not great and are not truly things that matter. The quote compares that to a thistle floating on water. The gemstone, which represents the wise person, sinks. That is saying that the wise person doesn't brag about his abilities, he simply does what he knows how to do and continues to learn how to do more.

Live in Peace

Wise people live together in peace. Even if other people speak a different language, practice a different religion, or have a different skin color. The wise person knows such things are superficial and should not be used as excuses to hate others. The foolish people look for anything that makes others different, and uses those things to hate them, refuse to help them, or even start wars with them. God never wanted people to hate each other. He wants all of us to live together in peace. The wise people strive to live according to God's Law, the fool makes up his own laws to live by.

“New details about

Betelgeuse's companion star"

Betelgeuse is a famous bright red star in the constellation Orion the Hunter. It's famous in part because it will one day *explode*. Late last year, scientists announced Betelgeuse

likely has a companion, which has since been confirmed and nicknamed *Betelbuddy*.

On Wednesday, researchers from Carnegie Mellon University said their observations show the companion star is not what they expected.

“New study says water in Venus’ clouds surprisingly abundant”

- **Venus' clouds contain droplets that are highly acidic.** Scientists thought they were mostly sulfuric acid with some water. But is that true?
- **A new analysis of data from the Pioneer Venus 2 mission** in 1978 shows the droplets have less sulfuric acid and much more water than previous estimates, along with oxidized iron.
- **Venus' clouds could therefore be potentially more habitable** for microbes than scientists have long thought.

“Webb glimpsed doomed star before it exploded”

Astronomers have captured the most detailed glimpse yet of a doomed star before its death.

The star came to our attention when we saw it explode as a supernova on June 29, 2025, in a galaxy 40 million light-years away. And this galaxy, NGC 1637, had already been imaged by the James Webb Space Telescope. So astronomers were able to study this imagery to identify the supernova's source star, or *progenitor*.

It's the 1st time Webb has identified a supernova progenitor. And it revealed the doomed star was a red supergiant, cloaked in an unexpected shroud of dust.

The Value of Wisdom and Feeding the Soul

“If wisdom now be held in low esteem, it is not wisdom’s loss but the loss of man. Wisdom cries outside the palace and the hovel. She is heard in the streets and in the gathering places. Her voice says, “O fools and sons of fools, how long will you delight in your foolishness?” But the pleasure of fools is in their foolishness, and the pleasure of the weak is in their own weakness, and therefore, they scorn the voice of wisdom.

“Let the fool eat of his tree; it will provide no sustenance in times of evil. When the whirlwind sweeps across the face of the land, bringing destruction in its wake, fools will be swallowed up, and Earth will

be as if they had never been.

“The nature of life is such that the fool does not always

fail, nor is the wise man always successful. Yet failure will always be the attendant of fools and success the servant of the wise. But how is earthly success or failure measured in regions greater than Earth?

“Wisdom is the food of the soul. The wise man nourishes his soul, and it grows in beauty and strength. The fool starves his soul, and it shrivels and is distorted by weakness.

“He who has grown to wisdom never acts but at wisdom’s command. To some has been granted the ability to soak up wisdom, as the sand soaks up water. If this be your gift from God, then hug it not to your own breast as would the mean man. Share it with those who are less wise for their instruction, and hide it not from the wise, for they will multiply it.”

-The Kolbrin Bible (MPR:20:10-14)

Wisdom in Low Esteem

Wisdom is held in low esteem today. Conservatives refer to those who seek spiritual development as “Woke,” a word that they say as if it were something evil instead of being the best thing that could happen to a person. As the quote says, it is Man’s loss, not Wisdom’s. Wisdom will continue to exist without Man. It is true, however, that if few people seek the Spiritual Light of the Spiritual Sun, that Light will go out again, and humanity will be trapped in a world of materialism.

The Pleasure of Fools

The material pleasures that are sought by fools are hard to resist. Even some who have started down the path of Spiritual Enlightenment can fall to the temptations of the material world when the Evil Ones whisper lies in their ears. That is why it is best for those developing their Spiritual Self to do so as part of a group that can help protect them from failure.

When the Whirlwind Sweeps

The whirlwind that sweeps away the material world is not an ordinary whirlwind. This is an allegorical reference to the power of God that will gradually change the world and the entire realm of matter, back into Spirit as it was in the beginning. Most of us have seen videos of people clinging to trees near the shore when a huge tidal wave is approaching, instead of going to higher ground where they will be safe. That is much like those who will cling to the material world as it disappears around them instead of making the effort to become Spiritual Beings.

Wisdom is the Food of the Soul

It is not true that wisdom is the food of the soul, although it is understandable why the Kolbrin Bible says this. It is God's Light that feeds the Soul, but only those who seek wisdom through Spiritual Development gain access to that light. It is true that the Light of the Sun of Righteousness shines on all of us, but only those who seek it with the proper attitude of love and humility can absorb it in any significant amount. So continue to seek Wisdom and Spiritual Light, and do what you can to help others awaken.

“Butterfly Nebula's Hidden Heart Reveals the Building Blocks of Planets”

At first glance, the Butterfly Nebula looks like a glowing insect pinned against the backdrop of space. Officially known as NGC 6302, it sits about 3,400 light-years away in the constellation Scorpius. Its colorful wings stretch across space, formed from the dying gas and dust of a star not unlike our Sun. For centuries, astronomers have admired its beauty. Now, with the help of the James Webb Space Telescope, you can see its hidden heart in a way never possible before.

“Astronomers find huge gas bridge linking 2 galaxies”

- **Astronomers discovered a massive 185,000-light-year-long hydrogen gas bridge connecting two dwarf galaxies.**
- **This bridge, along with a very long gas tail,** is thought to have formed due to gravitational interactions between the dwarf galaxies and the influence of the nearby Virgo galaxy cluster.
- **The discovery, made using the ASKAP radio telescope array,** helps scientists better understand galaxy evolution, star formation and gas dynamics between galaxies.
