December 1976 Editor: Rex Carol Salverson Volume XX, No. 1

STATE OF THE WORLD. As unusually large number of earthquakes, tidal waves and other natural disturbances reported around the world confirm the predictions of Janil in *First Prophecy to the Americas*. While radiations of the sun are intense, we can expect cooler climate and changing weather conditions. *Second Prophecy to the Americas* explains how Cosologists can alter these weather conditions for the better and affect the state of the world through reflection techniques. If the world is to benefit from our findings it is important that all those applying the techniques unite into a universal fellowship and encourage others to join them. Numbers are important in keeping the negative effects of a changing world under control.

—Gene Savoy, Head Overseer

JUST OFF THE PRESS. *First Prophecy to the Americas*, in the series: *The Prophecies of Janil*, is now off the press. Both the limited *Award* edition and the facsimile edition are now available. *Second Prophecy to the Americas* is scheduled to come off the press December 20th and will be available on that date (popular edition only). The *Award* edition will be delayed owing to the difficulties in Mexico. However, the paper made from tree bark is on its way to Reno from the interior of Mexico.

PROJECT "X"—*The Search for the Secrets of Immortality*, by Gene Savoy, is being published by Bobbs-Merrill and will be available in bookstores in March of 1977. This book describes the early research conducted by members of the Community in Peru, Mexico, and Amazonia. The techniques are discussed and the importance of the sun and its effect upon the brain and nervous system is brought out into the open for the first time. We feel after twenty years of silence it is time to talk more openly about the research being conducted by the International Community of Christ. The work of members of the Community has been given the name Project "X" in the book. Good reading. A must for every Cosologist.

NEW ARTICLES. *East/West Journal* has published an article on Janil and his prophecies in the December issue. Associates should find this piece interesting for many reasons. Good material to pass along to friends who may be interested in the Community.

THE MISSIONARY GUILD. For a contribution of \$100 Community associates may join the Missionary Guild. This special group is dedicated to publishing the Community's publications in different languages. Janil, *The Cold Clover*, has been published in Arabic and is currently being readied for the press in Spanish and Japanese. The benefits of membership are multiple. Those interested should refer to a recent mailing or write for information.

September 1975 Editor: Rev. Carol Salverson Volume XIX No. 7

STATE OF THE WORLD. Current weather conditions, floods, earthquakes and other disturbances of a geophysical nature on the planet bear out the prophecies of the Child Christ of the Andes and prophets who preceded him. They foretold changing conditions in the final age of the world as a result of the Messianic Sun of Righteousness sending forth its brilliant light and intense frequencies to the physical universe. Look for changes on the physiological and psychological levels of both men and animals, plants and marine life. Immunity is assured by application of techniques.
—Gene Savoy, Head Overseer

JUST OFF THE PRESS. The *Esset Transcripts/S.P.A.N.* are now completed, both in printed form and on cassette tape. These consist of Part I, an enlightening and highly relevant commentary on the ancient *Esset* (popularly known as the *Isisenes*), and Part II, a summary of systems and related techniques which have been used throughout time to alter consciousness through body, emotion and mind. There is a wealth of information here which can lead to a better understanding of the multiplicity of methods for personal development and the value of a total, integrating system.

SACRED COLLEGE SYMPOSIA. The symposia originally scheduled for August through November 1975 have been deferred to 1976 and will be held on a quarterly basis. This will allow us to concentrate more fully on the publication schedule, which is of high priority at this time. The schedule follows:

March 20 & 21	Symposium IX <i>CHRISTO-THERAPY</i>
June 20 & 21	Symposium X <i>CHRISTO-PHYSICS</i>
September 20 & 21	Symposium XI <i>CODE BOOK OF PROPHECY</i>
December 20 & 21	Symposium XII <i>PROPHECIES OF JAMIL</i>

APPOINTMENTS AND ORDINATION. The appointments of Reverends Paula Valherdie, James C. Geoghegan and William C. Weedman to Right Reverend was officially confirmed early this month. Ordinations are continuing for Associates who have completed at least 18 months of studies. Those who are eligible and have not been ordained are encouraged to make arrangements.

PUBLICATIONS. An order form for publications by Gene Savoy is enclosed. Ordering information for *The Esset Transcripts/S.P.A.N.* and symposia texts for the Sacred College will be mailed separately.

Volume XIX No. 6

Dear Associates:

Symposiums I, II & III have been well received and old Associates from earlier days who corresponded with the Mystery School of the Andes in Peru have been able to participate in oral instruction and meet with personnel.

Those who have joined the school in the last three years and who are restricted to correspondence have realized immense benefit from the personal contact. Each seminar consists of about 12 hours of oral instruction over a three-day period.

The sound department has acquired a Telex cassette duplicator and professional recording equipment. Copies of the three seminars will be available by the middle of the month on 60-minute cassette tapes of excellent quality.

Transcripts of the Seminars which are word-for-word copies of the tapes, including diagrams, are being printed. These scripts are averaging 100 to 150 pages in length in clear, easy-to-read Gothic type. We found the transcripts a little bit more than we bargained for and just as difficult to prepare for the text as book-length volumes which resulted in a 6-week delay on Seminar I. Each script is bound with a durable, black plastic cover. These transcripts are excellent quality, exciting reading and most instructive.

TAPE AND TRANSCRIPTS BRING THE SEMINARS right into the privacy of one's home. They eliminate the expense of travel and time, and many are taking advantage of this savings. It also permits those who may only be able to participate in a select number of Seminars to learn from the entire program. Those not familiar with the cassette program are urged to obtain a tape player. The tapes are helpful in getting the most out of the voice instruction.

The Community's new advertising program which may be followed in the February issue of PSYCHOLOGY TODAY is to be continued on a monthly basis. The 1/3 page vertical insertion advertises THE RECORDED NEW TESTAMENT. Ad copy will also appear in the March issue of THE ATLANTIC MONTHLY and the April issue of HARPERS MAGAZINE. THE SATURDAY REVIEW is running a special story on psychic phenomena in the February 22nd issue and our advertisement will be run in that edition. Associates can expect to see the Community's programs listed in the leading national magazines from now on.

A NEW MOTION PICTURE DEPARTMENT is currently being organized by the Community. Several scripts are under consideration and films will be made by members of the Community in collaboration with artists, directors and technicians friendly with the Community. Copies of the films will be made available to Overseers for showing in their respective communities when completed.

Volume XVIII No. 6

Dear Associates:

LAST MONTH'S EARTHQUAKE in Peru was stronger and of longer duration than the May 1970 quake that took the lives of nearly 70,000 Indians and completely destroyed Tugay, the little highland village where the Child Christ spent his last days. The large statue of Jesus erected following the catastrophe still stands at the cemetery, as does the Child's secret tomb. The Child predicted that Peru would be the scene of many disasters and that the whole world could learn of its own destiny by observing what takes place there.

SOLAR FLARES CONTINUE TO MANIFEST in the sun causing unusual weather conditions, disruptions of communications and unpredictable behavior patterns in living things. The enormous outpouring of electromagnetic energy, X rays to radio waves, nuclear particles and increased IF is resulting in unrest, disorientation and a loss of confidence in society for established systems and governments. We know from the predictions of the Child that solar bombardment will alter the planet upon which we live. Those Associates applying the techniques and energizing their energyfields will be better equipped to handle the ionization, energy, IF and concentrated visible light.

THE CHILD CHRIST TAPES WITH INCA MUSIC have been condensed into 3 cassettes. Not one word has been deleted. Gongs previously sent will be honored through Christmas. The 3 cassettes are free with contribution of \$37.50 to the Community's Recording Department. Order now since Christmas rush may result in mail delays. We recommend this series for Christmas because it was during Christmas of 1961 that the Child was present at the Final Communion Meal. One of the most inspirational experiences can be realized by listening to the story of the Child Christ as narrated by Jack Erasmien. A most remarkable series that has never been equalled. Everyone agrees that the story has an increased impact at Christmas time. His presence seems to flood the room during the recording and one's dreams are often filled with archetypal symbols and meaningful experiences as a result.

COPIES OF *ON THE TRAIL OF THE FEATHERED SERPENT* are still available at \$10.00 each. A wonderful Christmas gift. We recommend that Associates order from local bookstores to increase public sales. This is the second of a series aimed at the general public to be followed by a third. The solar techniques are listed at which become quite meaningful to the Associate familiar with the significance. The book is an excellent volume and recommended reading material since it deals with the use of techniques during time of great ordeal, suffering and calamity. A must for all Cosologists living in the world. Also a good way of getting to know Gene Savoy the man.

Volume XVIII No. 5

Dear Associate:

Desert Seminars are being held in Reno during the week of 15, 16, 17 of October and during the weekend of 25, 26, 27 of October. For information telephone Rev. Loren Lewis, 702-786-7827.

Graduates who have completed studies are now eligible for ordination at the Sacred Oversee in Reno. This includes Associates who go back to the Penzance school and all those who have completed at least eighteen months of study. A special letter on this subject is being mailed to those qualified. For further information call the Center.

The Community's Code Book and Manual is currently being prepared for the press. This important volume (Codex III of the Sacred Teachings of Light series) is an integral part of the program and gives greater meaning to the individual's participation in advanced programs.

The Community's Dream and Vision Analysis Handbook has finally been scheduled for publication next March, 1975, following the release of the Code Book mentioned in the above paragraph. Those who have already ordered this volume will be glad to know that the book is to include a large number of archetypal symbols and references.

The economic situation in the United States and other parts of the world dictates that all Associates and Reverends do their very best to tighten budgets and, above all, to find ways of saving money by eliminating unnecessary purchases. Food prices are still below those of other developed countries. By refusing to buy products that are not absolutely needed, by shopping and looking for bargains, savings can be made. A good place to begin is with the businessman. Look for bargains, try to lower the price if you make a cash purchase. Eliminate interest rates on credit cards or charge accounts. By going on cash basis you can insist on 2 percent discount; if not given, shop elsewhere. The secret of lower costs lies with the consumer who must go back to the cost-conscious consumer attitude prevalent in the 1920's and 1930's. Cut buying and costs will automatically lower.

THE AUTOMOBILE HAS BECOME A CONSUMER SPONGE due to high cost of purchase price, interest rates, high insurance, taxes and ever-increasing cost of fuel. License and registration fees as well as police vigilance on the municipal and state level with resulting fines for speeding over the very low speed limit of 55mph make driving a responsibility that some are finding unbearable. The automobile is the major polluter of the atmosphere, yet industry continues to make high horsepower engines that consume large amounts of gasoline with low mileage and dangerous exhaust. Automobiles dominate downtown streets and are a nuisance to pedestrians. Fifty thousand men, women and children are killed each year in automobile accidents. Because of these considerations, the consumer should either cut down on the use of the automobile or, when possible, eliminate it entirely and rely on buses, taxis and other public or collective transportation systems.

**COMMUNITY COMMUNIQUE APRIL
1974**

Community Communique

A Monthly Report and Review of the Arts,
Sciences and Technologies of Cosology

Editorial Staff: Rt. Rev. Myrle Kaulin and Rev. Sybil Ostrander
Layman: Loren Lewis, Associate

Published and Printed by the International Community of Christ - 149 North Arlington 240 - Evan, Nevada 89421

April 1974 Copyright © 1974 by ICC Volume XVIII No. 4

CODE BOOK: Once our Associates have received the DECODED NEW TESTAMENT, presently on the press, they will be eligible for the MINISTER'S CODE BOOK which is a guide for the individual considering ordination and pastoring assignment. This volume will immediately follow publication of the DECODED NEW TESTAMENT and is a must for all Associates because it lists our Constitution, Formation Papers, Proclamation of Human Spiritual Rights, Institutes, Precepts, Concepts, Ethics, Codes and other pertinent information. The manual is most important in helping guide the Associate in the ministerial duties within his or her own home or outside it, e.g., proper methods of baptism, marriage, exorcism, funeral rights, etc. Once the individual is ordained as an Overseer in the Community he or she must then decide to what extent each will serve humanity. The Code Book is both a Manual and Guide Book for general ministerial duties covering all situations. Publication date about June 8th, 1974.

INTERNATIONAL COMMUNITY OF CHRIST: The Community will henceforth be known under the proper and complete name of International Community of Christ for Advancement in the Religious Arts, Sciences and Technologies of Cosology. Cosology is a universal system of spiritual development which is being brought out of the Christian religion.

Eventually it will be taught internationally (translations of our scripture are presently being undertaken) to different cultures that question the Christian implications. There will be International Communities aimed at Muslims, Buddhists, Hindus, etc. And, while these Communities may be known under different names, Cosology will be the universal word that will bind them.

DESERT RETREAT: We are aware that many Associates cannot afford the time or the financial outlay necessary to make an extended trip abroad to visit pyramids for the purpose of receiving special techniques, which can be beneficial only at the areas in question.

But, there is no benefit possible from a mere reading of such techniques, they must

COMMUNITY CENTER: The Reno Center has expanded its office space to include a Control Chamber for the recently acquired Board of Reprints. We have also added a lithographic printing machine to our list of publishing tools and plans are being made to expand our publications into the field of magnetic tape recordings. Our staff has been reinforced by the presence of full and part-time volunteer workers, and the DECODED NEW TESTAMENT, Codex II, is being readied for the press. Like all true spiritual institutions, Cosology is destined to fulfill the need of a School of Light in every respect, as refined and noble as those which preceded it in Israel, Egypt, Persia, and other places of the ancient world. In other words, here at the Center, we are doing everything in our power to publish and distribute The Sacred Teachings of Light to as many seekers throughout the world as possible. However, you must be aware that Cosology's programs and activities, designed to further our goals, have increased administration and maintenance expenses substantially. Receipts to meet our expanding budget must be obtained from contributions. It would be regrettable if Cosology's great endeavor were to wither from lack of economic nourishment. We realize that not all can come to the Center and offer their services as workers but you, our Correspondent Associate, can become personally involved in the Community effort by maintaining your donations pledge on a regular basis. This small effort on your part, coupled with our earnest efforts at the Center, will help guarantee the fulfillment of our respective goals, benefiting you, your fellow Cosologists, and in the long run, all of humanity.

COLOR ANALYSIS: Cosology has made available to Associates a research project dealing with religious technology. Up to now Associates have been limited to studies in religious arts and sciences. The extension of our research and study into technology is necessary, because of the technological civilization that has developed over the past 50 years. We believe technology is a vital part of religious philosophy and has replaced metaphysics which has failed to solve the many problems of the seeker in today's world. Cosology teaches that religion, in the highest sense of the word (not to be confused with dogmatic religion), is a vital part of man's inner inclination which cannot be answered by empirical scientific technology. Western technology has claimed that traditional religion cannot meet man's needs. While this may be true, technology cannot meet these needs either. In view of this, modern man needs a superior religion that is both scientific and technical while at the same time meeting man's natural inclinations. Science claims that God is dead. If this is taken to be literally true, then man is dead; for man is (we are taught) created in the

COMMUNITY COMMUNIQUE SPRING 1973

ICC/Cosolargy

P. O. Box 4500, Reno, Nevada 89505

VOLUME 17

ICC REVIEW

SPRING 1973

COLOR ANALYSIS Cosolargy has recently made available to Associates a research project dealing with religious technology. Up to this time Associates have been limited to studies in religious arts and sciences. The extension of our research and study into technology is necessary, because of the technological civilization that has developed over the past 50 years. We believe technology is a vital part of religious philosophy and has replaced metaphysics which has failed to solve the many problems of the seeker in today's world.

Cosolargy teaches that religion (in the highest sense of the word, which is not to be confused with dogmatic religion), is a vital part of man's inner inclination which cannot be answered by technology as generally understood, viz., empirical scientific technology. Western technology has claimed that religion, in the traditional manner, cannot meet man's needs. While this may be true, technology cannot meet these needs either. In view of this, modern man needs a superior religion that is both scientific and technical while at the same time meeting man's natural inclinations. Science claims that God is dead. If this is taken to be literally true, then man is dead; for man is (we are taught) created in the image of God. Such a teaching, if accepted by educated nations, means that the spirit and the soul is not recognized by technological society. This is the outcome of empirical science and its inquiry into nature at the exclusion of seeking the nature of man. As a consequence, science and technology has gained more knowledge of nature than of man with the result that science and technology has advanced without the knowledge and wisdom necessary to handle that information (old age is nothing more than the inability of the organism to utilize the information locked up in the genes).
