

“Dwardu Cardona: Earth’s Primordial Stellar Host”

At our third conference, EU2014: All About Evidence, Dwardu Cardona presented a reconstruction of Earth’s cosmic history distilled from the universal mytho-historical record. He describes how the strongest scientific validation comes from space itself, as new instruments display extraordinary electromagnetic detail across the cosmos, confirming that this is indeed an Electric Universe.

Dwardu Edward Cardona (1937–2016) was born, raised, and

educated in Malta. In 1959, he emigrated to Canada and soon began to study catastrophism and the Solar System's cosmic history. Dwardu was the Senior Editor for Kronos, Editor of Aeon, co-founded the Canadian Society for Interdisciplinary Studies, and consultant for the UK-based Chronology and Catastrophism Review.

As an author, Dwardu published well over a hundred articles, notably on the Saturn theory. His legacy lives on through his five esteemed books—God Star (2006), Flare Star (2007), Primordial Star (2009), Metamorphic Star (2011), and his final opus, Newborn Star (2016).
