

“Stop Looking, Start Seeing”

Dr. Jacob Liberman. PHOTO: Stephan Fuelling

Dr. Jacob Liberman's presentation at the 2012 Cosolargy Conference was titled "Stop Looking, Start Seeing." His talk dealt with the self-regulating universe, how to stop looking and learn how to see, life guidance through higher intelligence and our own choices, and gaining a deeper understanding of life and its many mysteries from the perspective of a vision scientist. Dr. Liberman opened his presentation with the image of the "invisible wind," the "wind behind the wind," and science's interest in finding out what this invisible animating force of life is. Through demonstrations and personal tales, Dr. Liberman discussed "living choicelessly," "being in the flow," and the "sweetness shared between two people that can be so healing." He also discussed his newest research—measuring the light that comes *out* of the eye under certain circumstances.

Biographical Note:

Dr. Liberman is a pioneer in the fields of light, vision, and

consciousness and is the author of the books *Light: Medicine of the Future*, *Take Off Your Glasses and See*, and *Wisdom from an Empty Mind*. He earned a Doctor of Optometry degree in 1973, a Ph.D. in Vision Science in 1986, and was awarded an Honorary Doctorate of Science in 1996. Dr. Liberman has shared his discoveries and insights with more than 2,000 audiences worldwide and has been enthusiastically endorsed by luminaries in the fields of health, science, and spirituality, including Deepak Chopra, Louise Hay, Bruce Lipton, Jean Houston, and Eckhart Tolle. Best-selling spiritual author Gary Zukav has described Dr. Liberman's work as "deeply transformational," Jean Houston calls it "a manual for a whole new order of being," and Louise Hay says, "Jacob Liberman is one of my favorite teachers." Dr. Liberman is the inventor of several light therapy devices, as well as the first FDA-approved medical device that significantly improves visual performance. He is the founder of Exercise Your Eyes, Inc. and EYELIGHT, and the past President of the International Society for the Study of Subtle Energies and Energy Medicine (ISSSEEM).

"Cosmic Thinking and Being"

Dr. James Oschman. PHOTO: Stephan

Fuelling

Dr. James L. Oschman's presentation at the 2012 Cosolargy Conference was titled "Cosmic Thinking and Being" and addressed the themes of how to think cosmically; what goes on in the Unconscious; Cosolargy and energy medicine; human interconnectedness with the living cosmos; the convergence of quantum physics, quantum biology, cosmology and Cosolargy; and the relationship of the human heart and the solar heart. Oschman addressed these topics by taking the audience through a sequence of his "meetings with remarkable people": Edgar Mitchell, the Apollo 14 astronaut who founded the Institute of Noetic Sciences; Rudolph Schild, the Arizona-based astrophysicist who tells us to forget about the "Big Bang" and to understand that so-called "Dark Matter" is Consciousness (see his book of collected essays, *Consciousness and the Universe*); Buckminster Fuller and his "bucky balls"; Neil Tyson, author of the 1957 article on stellar physics "Synthesis of the Elements in the Stars," who tells us "the universe is in us"; G. I. Gurdjieff, who told us of the cosmic clock and man's stolen spiritual birthright; Duane Elgin and his concept of the creation of the universe and its waves of creation; Vladimir Ginzburg, author of [Prime Elements of Ordinary Matter, Dark Matter & Dark Energy](#), who conceived of the living universe; [Aiden Dwyer, the 13-year-old who designed the solar tree](#); the Filipino villagers who used plastic water bottles filled with water and planted in ceiling holes to serve as light bulbs; and the "mundane angel" who had once informed Oschman that angelic entities are interested in the work he is doing.

Biographical Note:

Doctor Oschman is a biophysicist and biologist. He is an internationally known author and one of the first scientists to investigate the basis for complementary and alternative medical therapies. Recently he has become a member of the Academy of the Jamilian University as a student of Cosolargy.

He has published more than 30 full-length scientific articles in some of the world's leading academic journals and 50 articles in alternative and complementary therapy journals. Dr. Oschman has done research in major laboratories around the world, including at Cambridge University, Case-Western Reserve University, and the University of Copenhagen. He has also been on the faculty of Northwestern University in Evanston, Illinois, and a staff scientist at the Marine Biological Laboratory at Woods Hole in Massachusetts.

Dr. Oschman has also served as Acting President of the New England School of Acupuncture and as President of the International Society for the Study of Subtle Energies and Energy Medicine.

He continues his research and writing in Dover, New Hampshire, where he is President of Nature's Own Research Association, while presenting lectures and workshops on energy medicine around the world.
