Volume XVIII No. 6

Dear Associate:

LAST MONTH'S EARTHQUAKE in Peru was stronger and of longer duration than the May 1970 quake that took the lives of nearly 70,000 Indians and completely destroyed Yungay, the little highland village where the Child Christ spent his last days. The large statue of Jesus erected following the catastrophe still stands at the cemetery, as does the Child's secret tomb. The Child predicted that Peru would be the scene of many disasters and that the whole world could learn of its own destiny by observing what takes place there.

SOLAR FLARES CONTINUE TO MANIFEST in the sun causing unusual weather conditions, disruptions of communications and unpredictable behavior patterns in living things. The enormous outpouring of electromagnetic energy, X rays to radio waves, nuclear particles and increased IF is resulting in unrest, disorientation and a loss of confidence in society for established systems and governments. We know from the predictions of the Child that solar bombardment will alter the planet upon which we live. Those Associates applying the techniques and energizing their energy-fields will be better equipped to handle the ionization, energy, IF and concentrated visible light.

THE CHILD CHRIST TAPES WITH INCA MUSIC have been condensed into 3 cassettes. Not one word has been deleted. Coupons previously sent will be honored through Christmas. The 3 cassettes are free with contribution of \$37.50 to the Community's Recording Department. Order now since Christmas rush may result in mail delays. We recommend this series for Christmas because it was during Christmas of 1961 that the Child was present at the Final Communion Meal. One of the most inspirational experiences can be realized by listening to the story of the Child Christ as narrated by Jack Kruschen. A most remarkable series that has never been equaled. Everyone agrees that the story has an increased impact at Christmas time. His presence seems to flood the room during the recording and one's dreams are often filled with archetypal symbols and meaningful experiences as a result.

COPIES OF ON THE TRAIL OF THE FEATHERED SERPENT are still available at \$10.00 each. A wonderful Christmas gift. We recommend that Associates order from local bookstores to increase public sales. This is the second of a series aimed at the general public to be followed by a third. The solar techniques are hinted at which become quite meaningful to the Associate familiar with the significance. The book is an excellent volume and recommended reading material since it deals with the use of techniques during time of great ordeal, suffering and calamity. A must for all Cosolargists living in the world. Also a good way of getting to know Gene Savoy the man.

GENE SAVOY APPEARED on "To Tell The Truth" at NBC studios in New York recently to promote his latest book. Host Gary Moore, and panelists Kitty Carlisle, Gene Rayburn, Peggy Cass and Bill Cullins spent nearly fifteen minutes trying to discover the real Gene Savoy, and succeeded. The show will be televised this fall and we will keep Associates posted as to exact dates.

ISOLATED EXISTENCE DOES NOT EXIST. Every living thing is inter-related: from minerals, vegetables, animals, microbes and insects to humans. All creatures exhibit aspects of social interdependence and these associations are essentially cooperative, even though it may sometimes appear to the untrained eye that the opposite is true. Such interdependence of life forms necessitates information (IF factors) sharing. Some of the most obvious examples of IF communication are seen in the life styles of ants, bees and termites; as solitary or isolated creatures they cannot survive, but as a group they pool their intelligence (by a non-verbal means) to create a collective whole or colony that functions as a kind of live computer.

Humans function in ways that mirror other life forms. This should not be surprising to Associates who already know that man is linked to the cosmos, on a microscopic as well as macroscopic level, with access to information from solar photons. Man's inherited ability of verbal communication or language is an additional gift that allows modern man to process, store and retrieve information in an unprecedented manner. The key to survival, in this world as well as in another, lies in the application of the vast accumulated information we are heir to. Do we merely continue to build more and grander nests as do termites, or can we raise our sights to glimpse the source of our intelligence and being?

ORDINATIONS AND ORAL TEACHINGS ARE IMPORTANT and each Associate is encouraged to write or telephone Reno to make arrangements for these ceremonies. Associates who have been associated with the Community for many years have undoubtedly discovered a lack of continuity of communication from the Center. While it is true that our scheduling of materials is late, this lack of communication should be expected. The object of the system is to take Associates through a program of techniques which prepare the individual for Overseership. Each must understand that there is no way we can or will give the meaningful information by letter. We can only prepare each Associate by mail for the oral teachings.
