### The Origins of Cosolargy

#### *Quotes from Gene Savoy, Sr.*

"THEREUPON, The Man's heart began to flutter, and he drew a great breath: he lived. His mind was filled with gladness, and his spirit rejoiced. He rose from his bed and looked in a mirror. Struck by his appearance, he stood transfixed examining the reflected image—a new person. The color of his eyes had changed, and they radiated a Light+. Rebirth had been bestowed upon him. He knew that immortality was a joyous gift granted by God+.

It was not a matter of worship or sacrifice, not even a matter of ethics or intellectual striving."

## Real Treasure Isn't Silver or Gold

*"The most valuable treasure one may have is the Knowledge, Wisdom, and Love he has. The teacher is for this: to deliver knowledge to the student. The student's task in return is to apply it.*

*"Many blame God why is he not helping them? God helps those who do their best, Help yourself in order for God to help you as well.*

*"Not to pay what you owe means you have no belief. Later you will pay everything with interest.*

*"The thought of a man has a transforming power. The good, right, nice thought can transform your desperation into a quiet and pleasant condition. The thought of a man is a magic wand with which you can create miracles." ~Biensa Douno*

### Real Treasure

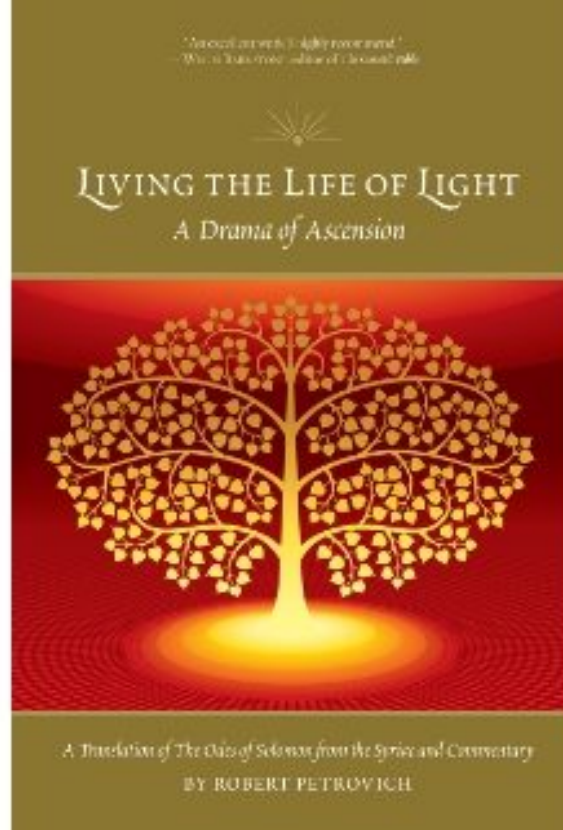

Many things in the material world are considered treasures. Money, gold, luxuries of all sorts. Yet look at those who have such things. Are they better people than the rest of us? Are they more advanced than the rest of us? The answer to both questions is no, they are not.

A real treasure is something that truly benefits us. Real treasure helps us grow spiritually. It isn't something we lose when we leave the physical world. Knowledge, wisdom, truth, and love are real treasures.

## DIGITAL EBOOK

### **Living the Life of Light: A Drama of Ascension** **A Translation of the Odes of Solomon with Commentary**

**By Robert Petrovich**

The Odes of Solomon are extraordinary songs of spiritual triumph from the messianic age that continue to resonate with our souls today. Each Ode expresses a point of high spiritual experience and dramatic intensity, like songs in a modern American musical. Together they tell the epic story of the personal transformation of a burgeoning Child of God.

Living the Life of Light offers the first coherent modern translation and interpretation of these Odes, with commentary that leads the reader through the messianic drama and process of spiritual regeneration the poet has laid out in his poems but has gone unrecognized until the appearance of this breakthrough book.

### **The Spinning Sun in Georgia USA**

Recently I wrote about witnesses who have experienced the Sun spinning and flickering in strange ways at Medjugorje in Bosnia, eerily replicating the events at

Fatima ninety-nine years ago. There is another case of similar occurrences in the town of Conyers, Georgia, USA, where according to a New York Times report in 1998, "Worshippers pray and sing, and aim their camcorders at the sky, hoping to record the flickering of the Sun or perhaps the opening of the door to heaven." At the centre of it all is a middle-aged

mother, Nancy Fowler, and she – like others where such happenings occur - also claims to communicate with the Virgin Mary.

At noon on the thirteenth day of every month, thousands of people who have come from all parts of the world, gather at Conyers to watch the event. They report that the Sun becomes pure white light and that a smaller white disc sometimes circles it. The solar disc also "blinks." It is said that on some occasions golden powder or rose petals fall from the sky.

Video of the solar phenomenon has been caught on camera – concurring with what witnesses say they actually see. This one, for example, runs for seven and a half minutes... for the solar event, see minutes 2:00 to 3:30:

Mrs. Fowler says that Mary tells her to warn us about an impending war with China. Maybe that is the third mysterious secret of Fatima that has been hushed up by the Vatican? As always, I find the visible actions of the Sun to be of greatest interest.
